Date of Activity held	28/12/2023
Time	11.30am to 01.00pm
Type of Activity (cultural/curricular/co-curricular)	Talk on Entrepreneurship (Cultural & Extra-Curricular)
Entrepreneur:	Shri. Rahul Mahalank
Professional Details of Resource Persons/Guests	Proprietor, Blue Smart Elevators, Belagavi.
Year / Class –	All Students
No. of students-	117
Activity In charge-	Prof. S. G. Huddar

Description of Activity:

Shri. Rahul Mahalank, Proprietor, Blue Smart Elevators, Belagavi addressed the students about the entrepreneurship. He explained what “entrepreneur and entrepreneurship” actually means. Students of EEE dept. participated in the discussion with great interest. Further he discussed in detail about next generation entrepreneurship and how to generate an idea. He interacted with students and discussed about job opportunities for engineering students and motivated the students to become an entrepreneur.

It was felt that creating awareness amongst the students about “Entrepreneurship as a career option” was essential.

Justification:

1. Justification for Mapping of POs & PSOs

Mapped POs/ PSOs	Weightage	Justification
PO1	3	This activity substantially helps to develop an understanding of the fundamental elements such as Problem-solving, critical thinking, creativity, leadership, collaboration, and communication in design thinking projects.
PO2	3	This activity substantially highlights the problem-solving approach which has the intention to improve products.
PO3	3	This activity substantially highlights a wide number of potential solutions and then narrows these down to the best fit solution.
PO4	3	This activity substantially helps to understand the use of the research tool for the iterative process, identify alternative strategies and create innovative solutions for the prototype.
PO6	3	This activity substantially allows high-impact solutions to social problems for clients and consumers to solve society-related problems.
PO7	3	This activity substantially accelerates the opportunity to investigate design alternatives and minimize the environmental, social, and economic impacts of their product.
PO8	3	This activity substantially highlights the ethical values such as Trust, honesty, responsibility, respect, and fairness to create harmony and professionalism in teams, which in turn leads to project success.
PO9	3	This activity substantially encourages the collaboration, flexibility, curiosity, and positivity, creating excellent teams and positively influencing the outcome to find the solutions that best project.
PO10	3	This activity substantially highlights the manage their teams and coordinating efforts to bring about successful prototyping and testing through open communication.
PO11	3	This activity substantially involves a better understanding of their end-users to develop insight and direction for the task at hand and resources managed include personnel, finances, technology, and intellectual property.
PO12	3	This activity substantially helps the solving critical global problems or tackling micro-level projects; visualization reveals key themes and patterns.
PSO1	3	This activity substantially addresses about design thinking will continue to evolve and be used in different industries to help create new products, services, and experiences.

AY:2023-24

PSO2	3	This activity substantially addresses about non-linear, iterative process that teams use to understand users, challenge assumptions, redefine problems and create innovative solutions to prototype and test.
PSO3	3	This activity substantially addresses the design thinking is a versatile problem-solving framework that you can use for virtually any challenge or project. The five stages of design thinking Empathize; Define, Ideate, Prototype, and Test help your team overcome the ambiguity of problem-solving. It encourages teams to collaborate with each other to come up with the best solution for complex problems.

1. The activity mapped with PO1, PO2, PO3, PO4, PO6, PO7, PO8, PO9, PO10, PO11, and PO12 was found satisfactory with attainment levels of 2.47, 2.47, 2.47, 2.47, 2.47, 2.47, 2.47, 2.47, 2.47 and 2.47 against the mapped values during the impact analysis.
2. The activity mapped with PSO1, PSO2 and PSO3 was found satisfactory with attainment levels of 2.47, 2.47 and 2.47 against the mapped value during the impact analysis.

Conclusion: The activity is organized to fulfill the program outcomes engineering knowledge, problem analysis, design/development of solutions, conduct investigations of complex problems, engineering and society, Environment and sustainability, Ethics, Individual and teamwork, Communication, Project management & finance and lifelong learning.

Future Suggestions: Ideas, research innovations, and incubation cell activities help to promote the innovation and design thinking process.

Justification:

1. Justification for Mapping of POs & PSOs

Mapped POs/ PSOs	Weightage	Justification
PO1	2	This activity addresses moderately about understanding of mechanical engineering, data analysis, product design, and, in some cases, graphic design.
PO2	2	This activity addresses moderately for problem-solving skills help product designers find solutions to consumer problems or needs. These solutions can give product designers ideas for innovative products to enhance a consumer's experience. Problem-solving skills also allow designers to identify and eliminate errors in product design.
PO3	1	This activity addresses helps for product designers use different aspects of visual design to create an aesthetically pleasing product for consumers. Visual design helps product designers construct prototypes of products to present to stakeholders and clients.
PO4	1	This activity focuses on product designers implement user research to identify the needs of consumers. This helps them design a product that provides a solution for users or appeals to market demands
PO5	2	This activity addresses moderately about product design professionals may use computer coding to develop product software or user experience designs. Coding skills allow a product designer to write code to instruct devices or applications to perform specific tasks or functions. Coding skills involve learning a multitude of coding language.
PO8	2	This activity addresses moderately about design ethics is about being aware of how your designs can impact the welfare of people, society and the environment. It helps reduce the risk of causing harm.
PO9	1	This activity addresses a product designer often collaborates with other designers and developers to produce a functional product. A designer may also communicate with team members to form solutions for product functionality and designs. They can also use teamwork skills to understand project goals, gather feedback and apply team member's product design ideas.
PO10	1	This activity addresses communication skills are important for professionals in product design. While designing a product, a designer may communicate with a team to delegate tasks and complete the project by its deadline. Communication skills can allow a designer to communicate effectively with clients to understand their guidelines for a product and learn their business objectives.
PO12	3	This activity highlights substantially The dynamic world of product design can be an exciting field for creative's who want to design products that are functional, user-friendly, and aesthetically pleasing. This

		multidisciplinary field requires product designers to have a broad range of skills and knowledge in various domains to create products that solve problems, meet customer needs, and enhance their target audience's quality of life.
PSO1	1	This activity addresses moderately the responsible for the mechanical design of a new product, with specific reference to the mechanical function of the final product.
PSO2	2	This activity address moderately helps to design analysis employs the finite element analysis method to simulate physical behavior of a product design.

- The activity mapped with PO1, PO2, PO3, PO4, PO5, PO8, PO9, PO10 and PO12 was found satisfactory with attainment levels of 1.822, 1.822, 0.911, 0.911, 1.822, 1.822, 0.911, 0.911 and 2.733 against the mapped values during the impact analysis.
- The activity mapped with PSO1 and PSO2 was found satisfactory with attainment levels of 0.911 and 0.911 against the mapped values during the impact analysis.

Conclusion: The activity organized to fulfill the program outcomes engineering knowledge, problem analysis, design/development of solutions, conduct investigations of complex problems, modern tool usage, ethics, individual and team work, communication and lifelong learning and PSO1, PSO2 and PSO3 has mitigated the gap identified satisfactorily to some extent.

Future Suggestions: This activity highlights for product designing offers a diverse variety of job options in the product design and manufacturing industries, and as a result, it has a broad range of potential applications.

Impact Analysis and PO Attainment

Weightage

Justification:

1. Justification for Mapping of POs

Mapped POs/ PSOs	Weightage	Justification
PO1	3	This activity addresses substantially the intersection of engineering, entrepreneurship, and IPR is a powerful combination that can drive innovation, protect ideas, and create successful business ventures. By fostering collaboration and interdisciplinary education, stakeholders can enhance the potential for new technologies and entrepreneurial success.
PO6	3	This activity highlights substantially the interplay between engineering, society, entrepreneurship, and IPR is vital for driving social progress and economic development. By fostering a culture of innovation that emphasizes ethical considerations and societal impact, stakeholders can create solutions that benefit both individuals and communities, while also ensuring that inventors and entrepreneurs are rewarded for their contributions.
PO7	3	This activity highlights substantially about intersection of environment and sustainability with entrepreneurship and IPR is crucial for fostering innovation that addresses pressing environmental challenges. By supporting green entrepreneurship and ensuring robust protection for sustainable innovations, stakeholders can drive economic growth while promoting environmental stewardship. This collaborative approach can lead to a more sustainable future for businesses and society alike.
PO8	3	This activity addresses substantially interplay between ethics, entrepreneurship, and IPR is vital for building a responsible business landscape. By emphasizing ethical practices and ensuring that IPR is used fairly, entrepreneurs can create sustainable ventures that contribute positively to society while fostering innovation and trust. This holistic approach not only enhances business success but also strengthens community and societal well-being.
PO9	3	This activity highlight substantially integrating individual efforts with team dynamics is essential for entrepreneurial success and effective IPR management. Individual creativity fuels innovation, while teamwork ensures robust execution and protection of intellectual assets. Understanding the interplay between these elements can lead to a more comprehensive approach to building and sustaining a successful business.
PO10	3	This activity highlights substantially effective communication is vital for both individual contributions and team dynamics. Individuals enhance their communication skills to express ideas clearly, while teams create an environment that fosters collaboration and feedback. Understanding how these elements interact can lead to more productive and harmonious work relationships, ultimately driving project success.

PO11	3	This activity involves substantially integrating project management and finance with entrepreneurship and IPR creates a comprehensive framework for driving innovation while safeguarding intellectual assets. Effective project management ensures that entrepreneurial initiatives are executed efficiently, while sound financial strategies support the development and protection of valuable intellectual property. This synergy is crucial for building sustainable and competitive business ventures
PO12	3	This activity highlights substantially Lifelong learning is essential for entrepreneurs to thrive in a competitive environment and effectively managing intellectual property. By continuously updating skills, adapting to changes, and fostering innovation, entrepreneurs can leverage IPR as a strategic asset to enhance their business success. This integration supports sustainable growth and long-term viability in an ever-changing landscape.

1. The activity mapped with PO1, PO6 PO7, PO8, PO9, PO10, PO11 and PO12 was found satisfactory with attainment level of 2.707, 2.707, 2.707, 2.707, 2.707, 2.707, and 2.707 against the Mapped values during the impact analysis.
2. **Conclusion:** The activity organized to fulfill the program outcomes engineering knowledge, engineer and society, Environment and sustainability, Ethics, Individual and team work, Communication, Project management and finance and lifelong learning and PSO1, PSO and PSO3 has mitigated the gap identified satisfactorily to some extent.
3. **Future Suggestions:** Such activity promotes as the landscape of entrepreneurship continues to evolve, proactive measures to enhance the understanding and management of IPR will be crucial. By investing in education, resources, and collaboration, we can create a robust ecosystem that supports innovation while safeguarding the rights of creators.

Impact Analysis: Around 60 % of respondents felt that talk was effective on UHV. The average of 58% and average of 33 % respondents expressed their feedback towards excellent and good in parameters 1, 2, 3, 4 and 5. It depicts that talks arranged to inculcate Universal Human Values (UHV's) are positively reinforced respondents. However around 9% of respondents raised question about excellency in relevancy activities in all parameters. In future we will rectify the flaws during the future conduction of induction programme.
