[illegible]

On May 20, 2017, the standard minimum sentence was reduced from 10 years to 5 years for those convicted of a first-time offense. This change was made to encourage rehabilitation and reduce the prison population.

[illegible]

The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved. Once the problem is identified, the next step is to analyze it. This involves breaking the problem down into its component parts and determining the causes of the problem. The third step is to develop a plan of action. This involves determining the steps that need to be taken to solve the problem. The fourth step is to implement the plan. This involves putting the plan into action and monitoring the progress. The fifth step is to evaluate the results. This involves determining whether the problem has been solved and whether the plan was effective.
