Impact Analysis on Feedback

AY:2020-21

Justification:

1. Justification for Mapping of POs & PSOs

Mapped POs/ PSOs	Weightage	Justification
PO1	3	This activity addresses substantially helps to develop better programming skills using engineering knowledge.
PO2	3	This activity addresses substantially to analyse by connecting multiple devices to each other and allow them to exchange real-time data in Arduino, IOT & Robotics Programming application used in mechanical engineering.
PO3	3	This activity addresses substantially helps to generate log, graph, analyze sensor data, trigger data and home automation in Arduino, IOT & Robotics Programming application.
PO4	3	This activity addresses substantially helps to designs, manufactures, and supports electronic devices and software, allowing people around the world to easily access advanced technologies that interact with the physical world.
PO5	3	This activity educates substantially understanding the Arduino hardware and software tools techniques to develop Arduino boards applicable to mechanical systems.
PO9	2	This activity educates substantially the importance of individual and team efforts in Arduino, IOT & Robotics Programming application with multidisciplinary approach.
PO12	2	This activity addresses moderately importance of use of hardware and software for utilization on large-scale automation and robotic projects.
PSO3	2	This activity provides exposure to the current issues of industries with help of advance Arduino technology using coding and programming language as multidisciplinary approach.

2. The activity mapped with PO1, PO2, PO3, PO4, PO5, PO9 and PO12 was found satisfactory with attainment levels of 2.943, 2.943, 2.943, 2.943, 2.943, 2.943, 2.943, 1.962 and 1.962 against the mapped values during the impact analysis.

3. The activity mapped with PSO3 was found satisfactory with attainment levels of 1.962 against the mapped value during the impact analysis

Conclusion: The activity organized to fulfill the program outcomes engineering knowledge, problem analysis, design/development of solutions, conduct investigations of complex problems, modern tool usage, Individual and team work and lifelong learning and PSO3 has mitigated the gap identified satisfactorily to some extent.

Future Suggestions: Such activities can be extended in line with current requirement for utilization in large-scale automation and robotic projects of mechanical engineering field as exposure to Artificial Intelligence, Machine Learning & Python Coding.
