Activity In charge-	Dr. S G Gollagi

About the Activity: Agile is an iterative approach to project management and software development that helps teams deliver value to their customers faster and with fewer headaches. Instead of betting everything on a "big bang" launch, an agile team delivers work in small, but consumable, increments. Requirements, plans, and results are evaluated continuously so teams have a natural mechanism for responding to change quickly. Software development teams have proven that implementing agile frameworks, like scrum and kanban, lets them deliver solutions to customers faster, with more predictability, and gives them the ability to react quickly based on new information. Implementing agile at the individual team level is relatively easy - the benefits are clear and the resources are plenty.
