PED and NSS unit have organized **International Yoga Day**. The function is inaugurated by Principal **Dr. S C Kamate** and briefed the participants about Yoga, a Sanskrit word which means "union", i.e., of the mind, spirit and body, has earned special recognition from the United Nations for which it has declared June 21st as World Yoga Day. It received the global stature due to its principles in treatment which are without any side effects. All staff members and students actively participated in event by doing yoga as per the yoga experts (PED Sir. S B Sarawadi, Prof. Prasanna, Prof. Preeti, & University Blue). This event is covered by new channel **News Hunt**. Physical education director Sri. S B Sarawadi welcome participant to event and Prof. Sachin Patil NSS Program Officer give a vote of thanks at the end.

4	Title of the Activity/Event:	Technical Talk on “Fuel Injection System & Engine Basics”																								
5	Date:	03-01- 2022																								
6	Venue:	Mechanical Seminar Hall																								
7	Objectives:	1. To understand the purpose of the fuel injection system in the engine. 2. To know about modern electronic injection systems in the CRDI engine. 3. To understand the role of the ECU system in the fuel injection system. 4. To understand different types of Fuel Injection systems in engines. 5. To understand the various engine features related to sensors, electrical wiring, troubleshooting, and maintenance.																								
8	Activity Outcomes:	1. Electronic fuel injection-equipped engines provide higher power and torque than a conventional engine. 2. A modern fuel injection system works by atomizing the fuel at high pressure, mixing it with clean air as it passes the inlet manifold, before entering the combustion chamber of each cylinder. 3. The advanced engine technology is designed to prepare the graduate for a career in the operation, service and repair, and maintenance of diesel/multi-fuel, and industrial and consumer-use engines and equipment.

Sub: Regarding Technical visit to Hidakal Dam for Second year Engineering Students,

Dear Sir,

With reference to above cited subject as a part of academic curriculum, the students and faculties of Department of Civil Engineering, S.J.P.N.T's Hirasugar Institute of Technology, Nidasoshi are going to visit your premises.

The students wish to visit the Dam site to understand Civil Engineering Concepts which is the part of their academic curriculum. We will undertake the responsibility of our students, for their behavior, any loss and damage during their visit.

Hence, we kindly request to permit the site visit and also provide valuable technical inputs so that our students can understand and appreciate.

The students (20No's) and faculties (06 No's) will be visiting the site on 14th Feb, 2022. (i.e., on Monday). The visit will be purely for academic purpose.

Kindly grant the permission for the same and do the needful.

1. Sugar from Sugar Cane: Production Process with Flow Sheet:

The bulk of sugar cane is cut by hand (manually) with a cane knife, but sometimes mechanical cutting is also being practiced in some other countries. The cut sugar cane is then loaded to vehicles and transported to the mill. At the first end of the factories the cane is usually weighted, washed and chopped into smaller pieces before the cane is feed to mills (Tandems) for juice extraction. Juice extraction is mostly done by passing the chopped cane through a series of rollers or horizontal mills. The rollers are laid in a triangle which is supported by a mill housing made of cast iron or cast steel.

The prime objective in sugar cane milling is to extract the greatest possible amount of sucrose from sugar cane, and to make the final bagasse as dry as possible so that it will burn readily in the boilers. The tandems are a train of mills preceded by various combinations of cane preparation devices. The power required by the mills is obtained from steam turbines followed by gear boxes for speed reduction. During the last few years diffusers have been installed in various sugar factories instead of mills. This new method of extracting sugar from sugar cane has proved advantageous from the technical point of view. Diffusion has been accepted as an efficient way of achieving high extraction. The capital investment and maintenance costs of diffusers are lower than those of mills, but the moisture of the bagasse obtained here is high hence reducing boiler efficiency.

2. Sugar Production Process:

Next to this important process, juice extraction, the raw cane juice is weighted and carried to liming process. The fibrous part called bagasse is transported to furnaces for burning. The liming station of the cane juice is one of the most important stations in a raw-cane sugar factory. Raw sugar cane juice is composed of a great number of organic and inorganic compounds, acids, salts etc in varying amounts. When it comes from the mill tandem, the juice is an opaque liquid varying in colour from greenish-Gray to dark green, and it carries suspended matter such as fine bagasse, gums, albumin, wax, colouring matter, particles of soil sand clay and muck. The normal cane juice has PH 5.2 – 5.4. The gums, wax and albumin make the raw sugar juice rather viscous, and it cannot, therefore, be readily filtered when cold. Liming and heating cause many impurities in the juice to become coagulated and precipitated out. At the same time the acids are neutralized, and any phosphates present are flocculated, adsorbing a large amount of colouring matter, solids and other impurities.

Usually, the lime is added to the raw sugar cane juice in the form of milk of lime, for better dispersion and quicker reaction.

Figure 2.1 Schematic view of sugar production

The next process after liming of sugar cane juice is clarification. Without good clarification of sugar cane juice, the production of good quality raw sugar is impossible. The purpose of clarification is the precipitation and removal of all possible non sugars, (organic & inorganic) and the preservation of the maximum sucrose and reducing sugars possible in the clarified juice. The greatest part of sugar cane consists of soluble inorganic compounds or ashes. A certain amount of fibre, mainly cellulose, also remains in sugar cane juice after crushing, which passes through the hush-hush screen in the form of bagasse. The raw cane juice is generally limed to PH 8 in order to obtain clarified juice of about PH 6.8-7.2 clarified juice is concentrated to a syrupy consistency before it is sent to the vacuum pans to be crystallized into raw sugar. The concentrate is made in several evaporators connected in series called a multiple effect. The juice travels from one vessel to another because of the gradual increase of vacuum. The vapours obtained in each body of the multiple effects serve to heat the calandria tubes and to evaporate additional water in the following vessel. And after being evaporated in a multiple effect evaporator to be a syrupy consistency, clarified juice must be evaporated further for the sugar to crystallize. This is accomplished in a vacuum to form a heavy mixture of crystals and mother liquor, called massecuite. The raw sugar massecuite is then crystallized by cooling. On this process residual syrup incapable of crystallizing called

black strap molasses is separated. Finally, Batch & continuous centrifugal are used to separate the liquid and hard phases of raw sugar.

3. Waste Product of the Sugar Industry

The sugar production industry generates solid wastes (from the washing of the beets and the precipitates of calcium carbonate) and liquid wastes (from the washing and evaporation steps). The main side stream is sugar beet pulp (SBP), which accounts for 3%–5% (w/w) of sugar beet.

4. By-Products of Sugar Factory

A sugar factory produces not only sugar, but huge amounts of sugarcane waste by-products every year. From the harvest to the final processing, there are 4 main sugarcane waste by-products produced which are: sugarcane bagasse, dry leaves, sugarcane press mud and sugarcane molasses.

5. Conclusions

Sugar industries are the oldest food processing industry and interlinked with environmental aspects. Environmental impact assessment study gives the clear vision between sugar industries, socio-economic and environmental consequences. Hence Our students are exposure to layout of sugar plant, sugar cane crushing mechanism and importance of by products to generate electricity from cogeneration power plant.

4	Title of the Activity/Event:	Industry Visit at Rajeev & Rao Company, Belagavi			
5	Date:	04-06- 2022			
6	Venue:	Belagavi, Karnataka			
7	Objectives:	1. To understand the working principles of ball valves, cutting tools, and industrial valves. 2. To understand valves, face cutters, and valve fittings. 3. To understand layouts of industry. 4. To Understand the manufacturing of valves by using CNC machines 5. To understand the importance of valve selection in the mechanical engineering domain.			
8	Activity Outcomes:	1. Proper valve selection is critical for the ideal operation of any system. Improper valve selection can cause system underperformance or failure. The greatest problem when selecting valves is incorrect information. 2. Application of valves such as starting or stopping the flow, regulating or throttling flow, preventing backflow, or relieving and regulating pressure in fluid or gaseous handling applications.

1. About Rajeev and Rao Company:

Rajeev and Company are manufacturing and exporting of Ball Valves under the brand name KAVAATA VALVES with head office at Belgaum Karnataka. We are an ISO 9001:2008 company and renowned for high quality high precision low torque ball valves. Incepted in the year 1996 Rajeev & Company is an ISO 9001:2008 certified company engaged in manufacturing and exporting finest quality of Ball Valves to the market under the brand name KAVAATA VALVES. Our offered products consists of Three Way Ball Valves Flanged End Ball Valve Forged Steel Ball Valve Screwed End Ball Valve High Pressure Ball Valve Metal Seated Ball Valves Fire Safe Ball Valve and Cutting Tools. We also offer Special Purpose Ball Valves such as Ball Valve With Male Adapter Flange End Ball Valve With Limit Switch Peep Hole Ball Valve for Blast Furnace Cavity Filler Ball Valves Electropolished Ball Valves and Low Pressure Cut-Off Ball Valve.

2. The Details of the visit

The Department of Mechanical Engineering, HSIT college of engineering organized a one day. Industrial Visit to "Rajeev and Company", Belgaum, on 4th June 2022 for Final year students. The visit was organized with the prior permission and guidance of Dr.M.M.Shivashimpi. A total of 41 students along with 3 faculty members have joined the visit.

- We Reached Rajeev and Company by 3:45 pm on 4th June 2022
- At 4.00 p.m. We are welcomed by the Mr. Rajeev sir, from Rajeev and Company. He gave instructions before visiting the company. He also had given oral explanation about the ACE Designers solution company overview. Which makes the students to know about the company. And also he explained what kinds of materials are used by them, and what are the process will they will do during manufacturing the valves.
- At 4.15 p.m. We visited the Rajeev and Company. Where we got information about the following technology:
 - Machine validation & testing for CNC Turning machines product range.+
 - CNC technology.
 - Products Manufactured in the company.
 - Showed all the machines which are used to manufacture the valves.

- At 4.45 p.m. We visited the shop floor with the engineer Mr. Rajeev sir. At each layout we got about the explanation of the each part which is to be installed in the lathe.
- After words they explained about their some projects.
- At 5.00 p.m they showed some ordered valves and how the actual process will be there after getting order from different countries like Abu Dhabi, Qatar, England, USA, Turkey etc
- Finally at the end of the session at 6.00 p.m.
- Our faculty Dr. M. M.Shivashimpi on behalf of HSIT college of Engineering, has given a vote of thanks for the Rajeev and Company, for giving a great opportunity to visit the plant.

5. Conclusions

It manages direction or controls the flow of a fluid or gas by opening and closing of various passageways. Valves play a vital role in most of the industries involving pipelines or other applications. Some of the common industries having valves are oil, gas, petrochemicals, marine industry, and many more. Hence students get exposure to various types of valves which help them to develop technical skills about working principles and application of valves.

Respected sir,

Subject: Seeking permission for Industrial visits during 1st to 4th June 2022 reg.

We the students of 8th Semester Mechanical Engineering Department are interested to visit the industries, Divgi Industries Private Limited, Banavasi Road, Sirsi and Rajeev & Company, Belagavi during 1st to 4th June 2022. So, we kindly request you to permit us for the same. We enclosed the duly signed list of students & staff and industries e-permission letters.

We hope you will do the needful.

Thanking you sir,

Yours faithfully

1. Divgi Torq Transfer Systems:

	
Founder: Mr. Ramrao 'RN' Divgi	Founder: Mr. Bhaskar 'BN' Divgi

Divgi Metalwares Pvt. Ltd. (DMPL) was born in 1964 as a small scale manufacturing enterprise manufacturing of gears and screw machined parts under the leaderships of Ramrao, 'RN', Divgi's and brother Bhaskar (BN). As a joint venture with BorgWarner, USA between 1995 and 2016, the company gained speciality in the manufacture of specialized and highly engineered solutions for 4WD/ AWD vehicles. In 2016, the JV with BorgWarner was dissolved and Divgi TorqTransfer Systems formed as a fully Indian entity. Transmissions – manual, automatic and electric – were introduced into its products portfolio for utility vehicles, agriculture, commercial, industrial and construction equipment. Divgi-TTS currently has three facilities at Bhosari in Pune, Shivare in Pune Taluka and Sirsi, Karnataka. A greenfield site is under construction at Shirval, Satara Dist., Maharashtra. Divgi-TTS has an enviable customer base across the globe. These include Tata Motors, Mahindra and Mahindra, Ford, Toyota and Nissan and customers in Japan, Korea, China, Thailand, UK, and the USA.

Divgi Torq Transfer Systems in Sirsibanavasi Road, Sirsi is known to satisfactorily cater to the demands of its customer base. It stands located at Sirsibanavasi Road-581402. It has earned 50 reviews and aspires to develop a loyal customer base. The business strives to make for a positive experience through its offerings. Customer centricity is at the core of Divgi Torqtransfer Systems in Sirsibanavasi Road, Sirsi and it is this belief that has led the business to build long-term relationships. Ensuring a positive customer experience, making available

4. Product Engineering

The Products Engineering Department, a team of 23 graduates and post graduates from premier Indian institutes with an average of 15 years of experience in the automotive design domain possess a thorough understanding of the technological and mechanical aspects of the entire drive train of a vehicle and its impact on vehicle performance. This knowledge, coupled with a deep knowledge of the technologies and dynamics of its products, vehicle architectures – Rear-Wheel Drive and Front-Wheel Drive – and application of the technology to suit customer's specific requirements lays the foundation for the robust design and development of state-of-the-art solutions that form part of Divgi-TTS' stable of products.

A systematic development approach involves

1. Concept layout / Designing
2. System layout
3. Concept definition
4. Design engineering
5. Analysis of functionality
6. Optimization of existing systems
7. Value engineering
8. DFMEA
9. DFM / DFA

4.1 Tools

The designing is undertaken through systematic steps involving Modelling, Simulation, Stack Analysis, Verification and Validation of the product under design through design intent & process intent sample parts. Several design development tools are employed for modelling, simulating and validating the design parameters as per the precise specifications required by the customer. Some of the engineering software's employed are:

<p>Description of Activity: A lecture on "Pedagogical Initiatives" was arranged by ECE Department for all the staff members on 30/09/2021 which was delivered by Prof. S. B. Akkole, HOD, E&CE Dept., HIT, Nidasoshi.</p> <p>The lecture focused on the Innovative Learning Strategies for Modern Pedagogy. In that Sir explained & shared his experience about Adaptive Teaching. In adaptive Learning, All learners are different. However, most educational presentations and materials are the same for all. This creates a learning problem, by putting a burden on the learner to figure out how to engage with the content. It means that some learners will be bored, others will be lost, and very few are likely to discover paths through the content that result in optimal learning. Adaptive teaching offers a solution to this problem. It uses data about a learner's previous and current learning to create a personalized path through educational content. Adaptive teaching systems recommend the best places to start new content and when to review old content. They also provide various tools for monitoring one's progress. They build on longstanding learning practices, such as textbook reading, and add a layer of computer-guided support. Data such as time spent reading and self-assessment scores can form a basis for guiding each learner through educational materials. Adaptive teaching can either be applied to classroom activities or in online environments where learners control their own pace of study.</p>			
Objectives	RBT level	PO	PSO
In educational institutions at all levels, the primary goals and objectives of pedagogy is to promote student learning and enrich the overall system of education and they need to put into operation the methods, strategies and approaches in a well-organized manner.	L2	7,8,12	--

<p>Description of Activity: A lecture on "Deep Learning & Its Applications" was arranged by ECE Department for all the staff members & students on 29/10/2021 which was delivered by Dr. Mahadevaswamy Assistant Professor, VVCE, Mysore.</p> <p>The lecture focused on the Deep Learning applications & how it works. Deep Learning is a branch of Artificial Intelligence based on the use of artificial neural networks. These neural networks are inspired by the functioning of neurons in the human brain. In the same way that a neuron receives and transmits electrical impulses, an artificial neuron receives information which is transformed and sent to other adjacent neurons. In this way, the information is transformed as it is transmitted by all neurons until it reaches the end of the network. Finally, the network will offer an output with the results it has obtained based on the data it has received as input, of how it has been trained and the purpose for which it is being used.</p>			
Objectives	RBT level	PO	PSO
The main objective of the Deep Learning is to achieve tasks that a human would perform almost automatically but that become complex for a machine & Today, Deep Learning is considered the best image classifier and represents the state of the art in Computer Vision. These algorithms are the most used currently and the main object of research in that field.	L2	1,2,5,12	1,2

Description of Activity

The Session on **Introduction to Arduino programming & Cloud based simulation using Thinkercad** has been organized for 5th Sem Electronics and Communication engineering students on 03/12/2021 & 10/12/21. The resource person for the session is Dr.R R Maggavi ECE Department HIT Nidasoshi. The session started on 03/012/2021 at 02.00PM.Prof S. B Akkole HOD ECE Dept addressed the function and emphasized the need of Arduino programming and its use in career placements.

Dr.R R Maggavi handled the sessions for two days and gave simulations on session.
They covered the syllabus

1. Introduction to Arduino board.
2. Introduction to Thinkercad simulator.
3. Hands on with Arduino using Thinkercad.

The session was concluded on 10/12/21 at 05.00PM.with thanking note by Prof. Pramod Patil.

Description of Activity: A workshop on "PCB Designing and Testing" was arranged by ECE Department for 3rd Semester ECE students from 16/12/2021 to 19/12/2021 which was delivered by Mr. Tulasidas Salunkhe, Electrosal Hi Tech Pvt. Ltd. Nipani. In this workshop he gave tricks on PCB designing by using eagle software.

The workshop focused on the basics of PCB designing tools. Students used Eagle PCB tool and completed various activities based on PCB designing. The same tool can be used for designing the schematic layout of the circuit which can be then converted into an equivalent PCB design. At the end, students successfully completed their PCB designs. After the session on design, the participants were taught PCB fabrication process and the steps involved in PCB designing printing, etching, drilling, and component mounting, soldering and testing of circuits. Further these designed circuits were printed on the copper clad for the fabrication process. Next session students did component mounting, soldering and testing. Next sessions highlighted on how to generate a Gerber file. Last session was an interactive one and also gave their feedback.

Activity Report

Date and Time	21 st June 2022 at 11.00AM
Name of Activity	"Yoga- A Classical way of doing Surya Namaskar".
Type of Activity	Health and Fitness Awareness Program
Target Audience	4 th , 6 th and 8 th Semester Students
Number of Audience	51
Activity In-charge	Prof. Prasanna Patil

About the Activity:

STAC (Students and Teachers Association of Computer Science), Dept. of CSE has organized Institute level Yoga Day in order to create awareness among the students how yoga supports stress management, mental health, mindfulness, healthy eating, weight loss and quality sleep. A classical way of doing Surya Namaskar step by step with breathing has been practiced to students, which helps in improved Digestion, makes the spine and waist more flexible, helps in reducing the fat.

A total of 51 CSE students with 1st year students, HoD's of other departments with our Principal, participated in the event and they realized the importance of doing Yoga-Surya Namaskar.

ACTIVITY REPORT

Date of Activity held	6 th December 2021
Time	3PM - 4.30PM
Type of Activity	Webinar: An overview of Agile ways of Working for Software Development
Jury Members:	-NA-
Professional Details of Resource Persons/Guests/Jury Members	-NA-
Participants	Students and Staff
No. of Participants	75
Activity In charge-	Dr. S G Gollagi

About the Activity: Agile is an iterative approach to project management and software development that helps teams deliver value to their customers faster and with fewer headaches. Instead of betting everything on a "big bang" launch, an agile team delivers work in small, but consumable, increments. Requirements, plans, and results are evaluated continuously so teams have a natural mechanism for responding to change quickly. Software development teams have proven that implementing agile frameworks, like scrum and kanban, lets them deliver solutions to customers faster, with more predictability, and gives them the ability to react quickly based on new information. Implementing agile at the individual team level is relatively easy - the benefits are clear and the resources are plenty.

Activity Report

Date and Time	27 th November 2021 at 12.00PM
Name of Activity	Guest Lecture on "Importance of computer science".
Type of Activity	Learning Job opportunities in Computer Science and Engineering
Target Audience	V Semester CSE Branch students
Number of Audience	29+
Activity In-charge	Prof. N.K.Honnagoudar

About the Activity:

A Technical Talk on "Importance of Computer science" was organized for all the students of CSE V semester by STAC, CSE Department, HIT, Nidasoshi. Objective of this event was to give awareness among students regarding Carrier Job opportunities in Computer Science and Engineering. The Resource persons for this Technical Talk was Dr.S.H.Angadi Professor & Head Department of Computer Science, R.E.C Hulakoti., During the session resource person explained the basic requirement to get the Job opportunities in Corporate World, and later they explained in detail regarding different Skill requirement and how students can develop themselves in the area of software and grab the jobs in Corporate Sector.

During this Technical Talk there was question and answering session, where many students asked lot of questions regarding Job opportunities in Computer Science and Engineering. The resource person clarified all the queries from the students. The session was very useful to the students, wherein students understood How to Grab the Job opportunities in Corporate Sector.. A total of 29+ CSE V Semester students attended the event and got benefitted.

Sl. No.	Objective of the Activity	Relevance to POs
1	To Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.	PO5

CONCLUSION

The dam visit gave students the first hand experience of the mega-structures such as dam & its reservoir. They got the knowledge about the purpose of the dam, design parameters like geology of the site, topography, capacity, size, shape, material, layout, life, cost, etc. The various components of the dam such as, dam, spillways, gates, galleries, canals, Instrumentation, Power generation plant, etc. Also the reservoir, embankments, dykes its catchment could be seen. Working of these components was understood. Also the students got the briefing about the service of these structures for the development of area and country.

2021-22

Date of Activity held and Time:	14/02/2022 9.30pm to 5.30pm
Name of Activity	"Industrial visit to Hidakal Dam"
Type of Activity: (cultural/curricular/co-curricular)	Co-curricular
Keynote Address:	Assistant Executive Engineer, Mr. S Kamat Prof. M.D.Patil and Prof.M.M Shivashimpi
Professional Details of keynote speaker:	Assistant Executive Engineer, Mr. S Kamat KNNL CBC Sub Division NO.2 Hidakal Dam.
No. of students:	07
No. of Staff:	02
Activity In charge:	Prof. M.D.Patil and Prof.M.M Shivashimpi
Description of Activity: A "Industrial visit to Hidakal Dam" was organized by Department of Civil Engineering and Department of Mechanical Engineering of the institute, for the 3 rd semester engineering students on 14thFebruary, 2022 as curricular and co-curricular activity. The event was addressed by Mr. S Kamat Assistant Executive Engineer Irrigation Department Hidakal Dam. The visit was focused on introducing students to the Various components of the Dam and its working.

Introduction :

Hidakal dam is a multi-purpose dam meant for Flood control, Irrigation, Domestic water Supply & Hydro-power generation. It is built across a Ghataprabha river originating in Amboli. Its Tributaries are Hiranyakeshi, Tamraparni and Markandeya. Its length is 260 km and it joins to Krishna River in Bijapur

HIDAKAL DAM

Dam across river Ghataprabha- Origin- Amboli

Tributaries- Hiranyakeshi, Tamraparni, Markandeya

Length- 260km, joins Krishna River in Bijapur- Rainfall in catchment is 6250mm to 1000mm

Drains 28 TMC of water 50% Dependable yield @ dam site- 85.20 TMC

TOTAL UTILISATION

- a) 84.42 TMC used to irrigate 7.84 Lakh acres through gravity irrigation (canal) including reservoir evaporation.
 - b) 0.392 TMC- Drinking water.
 - c) 3.328 TMC- Used by 3 lift irrigation schemes Kurni- Kochari, Rustumpur, & Kotabagi L.J Scheme
- Total- 85.20 TMC

STAGES OF GHATAPRABHA PROJECT

Stage I)

Ghataprabha left bank canal L=71 km It irrigates 1.2 lack acres Discharge $Q=42.45 \text{ m}^3/\text{sec}$

Stage II)

Part a) Extension of left bank canal from 72 km to 109 km – 38km irrigates- 2.25 lack acres
(Total 3.45 acres) $Q=56.6 \text{ m}^3/\text{sec}$

Part b) Construction of Hidakal Dam RL=662.3m in masonry, RL = 663.85m in earthen Live storage capacity = 23.20 TMC

Stage III)

- i) Raising Dam height by 3.70m (12ft) in masonry section to RL=660.0 & 4.3m in earthen section to RL= 668.1m with FRL/MWL-662.95m Storage capacity = 51 TMC Storage feeds Ghataprabha left bank canal, Right bank canal & chikodi branch canal, L
- ii) Construction of Right bank canal and chikodi branch canal irrigates 384000 acres
- iii) Lining of left bank canal with discharge = $0.56 \text{ m}^3/\text{sec}$ to increase discharge and minimise seepage loss so additional area irrigated 54997 acres
