Purpose of the Visit: The hydro power plant is the major contributor for the supply of the power needs. The different Turbine generators are used for the power generation depending upon the head and quantity of water source available. The Supa Dam Power Project is second high head hydro power generating station in India and first in Karnataka installed and run by the KPCL. The length of Dam is 300m and height is 103m, having catchment area of 17000 acres. The Capacity of the plant is 55MW of two units. The students have acquired the basic and practical knowledge of the power generating station.

The East Coast Paper Mill is the big paper mill in Karnataka and located at thick forest of the Karnataka.
