## FACULTY COURSE ASSESSEMENT REPORT (FCAR)

**Course Coordinator:** Prof: S. S. Ittannavar      **Class Strength:** 35  
**Semester:** V      **Subject:** Digital Signal Processing      **Code:** 17EC52

### **I. Program Outcomes (POs):** Engineering Graduates will be able to:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to

engage in independent and life-long learning in the broadest context of technological change.

## II. Program Specific Outcomes (PSOs):

PSO1:	An ability to understand the concepts of Basic Electronics and Communication Engineering and to apply them to various areas like Signal Processing, VLSI, Embedded Systems, Communication Systems and Digital & Analog Devices.
PSO2:	An ability to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive at cost effective and appropriate solutions.

## III. Course outcomes (COs): The student, after successful completion of the course, will be able to:

CO	Description
C302.1:	Define DSP and compute DFT and IDFT of various signals using its properties.
C302.2:	Apply the knowledge of DFT to find the computational complexity and convolution for long duration sequence.
C302.3:	Apply fast and efficient algorithms for computing DFT and IDFT of a given sequence.
C302.4:	Design and Analyze the structures of IIR filters.
C302.5:	Design and Analyze the structures of FIR filters.

## VI. Justification of CO-PO Mapping:

Mapping	Justification
C302.1-5 TO PO1	A high correlation since explaining the concept require a certain level of knowledge of mathematics and engineering sciences.
C302.1-5 TO PO2	A high correlation since explaining the concept require a certain level of problem analysis skills based on literature research. However, first principles of mathematics, science are required.
C302.1-5 TO PO3	A medium correlation since explaining the concept require a certain level of knowledge on designing / developing solutions considering public safety and environmental issues.
C302.3-PO4	A medium correlation since a higher level of knowledge such as research-based and research methods is not essential to give conclusions on the problems solved.
C302.4-PO4	
C302.1-5 TO PO5	Not using any modern tools to understand the concepts of operating systems.
C302.1-5 TO PO6	How better we can develop a DSP system that has less effect on health and security issues and how legal DSP can be developed.
C302.1-5 TO PO7	Good impact on society and environment are not included.
C302.1-5 TO PO8	Low correlation with Ethical values, team work and communication concepts are included.
C302.1-5 TO PO9,10	Team work and communication concepts are not included.
C302.1-5 TO PO11	A low correlation with demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
C302.1-5 TO PO12	A student working in DSP domain can apply the concepts studied in this course throughout his carrier.

## VII. Justification of CO-PSO Mapping (Digital Signal Processing – 17EC52):

Mapping	Justification
C302.1,2,4 TO PSO1	A medium correlation with understand the concepts of Basic Electronics and Communication Engineering and to apply them to various areas like Signal Processing, VLSI, Embedded Systems, Communication Systems and Digital& Analog Devices.
C302.3,5 TO PSO1	A strong correlation with understand the concepts of Basic Electronics and Communication Engineering and to apply them to various areas like Signal Processing, VLSI, Embedded Systems, Communication Systems and Digital& Analog Devices.
C302.1-5 TO PSO2	A medium correlation to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive at cost effective and appropriate solutions.

## MEASUREMENT OF COs, POs & PSOs ATTAINMENT

### Teaching Methodology:

- Lecture by Teacher
- PPT or Online demo etc.

### Assessment Tools:

- Continuous assessment
- Laboratory experiments
- End semester exam

### I. Assessment through Assignment:

A: Appeared    R: Reached    Low =1 (50-60 %)    Medium =2 (61-70 %)    High =3 (above 70 %)

COs	Assignment-1		Assignment-2		Assignment-3		Assignment-4		Assignment-5		Attainment level of CO in Percentage	Attainment level of CO	Mapped PO

engage in independent and life-long learning in the broadest context of technological change.

## II. Program Specific Outcomes (PSOs):

PSO1:	An ability to understand the concepts of basic Electronics & Communication Engineering and to apply them to various areas like Signal processing, VLSI, Embedded systems, Communication Systems, Digital & Analog Devices.
PSO2:	An ability to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive cost effective and appropriate solutions

## III. Course outcomes (COs): The student, after successful completion of the course, will be able to:

CO	Description
<b>C311.1</b>	Demonstrate understanding of MOS transistor theory, CMOS fabrication flow and technology scaling. ... L1,L2
<b>C311.2</b>	Draw the basic gates using the stick and layout diagrams with the knowledge of physical design aspects. ... L1,L2,L3
<b>C311.3</b>	Interpret Memory elements along with timing considerations. ... L1,L2,L3
<b>C311.4</b>	Demonstrate knowledge of FPGA based system design. ... L1,L2,L3
<b>C311.5</b>	Interpret testing and testability issues in VLSI Design. ... L1,L2,L3
<b>C311.6</b>	Analyze CMOS subsystems and architectural issues with the design constraints. ... L1,L2,L3

#### VI. Justification of CO-PO Mapping:

CO311-PO1	Strong correlation as explaining the concepts of the VLSI and requires good knowledge of mathematics and engineering sciences.
CO311-PO2	Strong and medium correlation since understanding and solving the course problems and derivations need better problem analysis skills and first principles of mathematics, science.
CO311-PO3	Weak correlation since explaining and solving some problems require certain level of knowledge of designing solutions considering public safety and environmental issues.
CO311-PO4	As we are not carrying out any research method or design experiments analysis and interpretation of data and synthesis throughout the course we can't correlate here.
CO311-PO5	As we are demonstrating some concepts using cadence modern tools or IT tools for the course hence we correlate to low level.
CO311-PO6	No correlation since this course doesn't discuss directly the societal, safety issues relevant to professional practice.
CO311-PO7	As one of the basic course in the domain of electronics and communication certainly has the impact on professional engineering solutions but to the weak level.
CO311-PO8	As we follow ethics in our behavior, while delivering the lecture, maintenance in classrooms conducting exams everywhere so, definitely we cultivate professionalism.
CO311-PO9&PO11	As we don't deal with Individual, teamwork, communication in relation to complex engineering problems and project management we can't correlate.
CO311-PO10	Weak correlation as communication on subject related concepts takes place through exams and discussions.
CO311-PO12	Weak correlation as one needs to have the knowledge of behavior of charges and some concepts.

#### VII. Justification of CO-PSO Mapping (VLSI Design– 15EC63):

Mapping	Justification
CO311-PSO1	As the course deals with the basic concepts of Electronics and communication we have given medium correlation.
CO311-PSO2	Medium correlation as the course doesn't expose to much to latest hardware and software tools.

### MEASUREMENT OF COs, POs & PSOs ATTAINMENT

## **FACULTY COURSE ASSESSEMENT REPORT (FCAR)**

**Course Coordinator:**

**Prof: S S Kamate**

**Class Strength:65**

**Semester: III**

**Subject: Engg. Electromagnetics**

**Code: 15EC36**

**I. Program Outcomes (POs):** Engineering Graduates will be able to:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## II. Program Specific Outcomes (PSOs):

The graduates of the program will be able to;

PSO1:	PSO1:	An ability to understand the concepts of basic Electronics & Communication Engineering and to apply them to various areas like Signal processing, VLSI, Embedded systems, Communication Systems, Digital & Analog Devices.
PSO2:	PSO2:	An ability to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive cost effective and appropriate solutions

## III. Course Outcomes (COs): The student, after successful completion of the course, will be able to:

CO	Description	Mapped POs	RBTL
C206.1	Explain basic concepts of Electric Fields and solve the problems in a given co-ordinate system.	PO1,PO2,PO3, PO8,PO10,PO12	L2
C206.2	Illustrate and verify Gauss divergence theorem and concept of potential and current density.	PO1,PO2,PO3, PO8,PO10,PO12	L3
C206.3	Solve the problems related to Laplace's equations and basic concepts of magnetic fields.	PO1,PO2,PO3, PO8,PO10,PO12	L3
C206.4	Solve problems related to stokes theorem and Magnetic forces.	PO1,PO2,PO3, PO8,PO10,PO12	L3
C206.5	Derive Maxwell's equations for varying fields and solve the wave propagation problems for free space and conductors.	PO1,PO2,PO3, PO8,PO10,PO12	L3

## VI. Justification of CO-PO Mapping:

C206.1-PO1	Strong correlation is given, as explaining and solving Electric Field related problems in a given co-ordinate system requires good knowledge of mathematics and engineering sciences.
C206.2.-PO1	Strong correlation is given, as explaining the concepts of Gauss law, divergence theorem and potential concepts require good knowledge of mathematics and engineering sciences.
C206.3-PO1	Strong correlation is given, as explaining the concepts of Laplace's and poisson's equations and basic concepts of potential, volume charge require good knowledge of mathematics and engineering sciences.
C206.4-PO1	Strong correlation is given, as solving problems related to stokes theorem and Magnetic forces requires good knowledge of mathematics and engineering sciences.
C206.5-PO1	Strong correlation is given, as explaining the concepts of Maxwell's equations for varying fields and solve the equations of wave propagation requires good knowledge of mathematics and engineering sciences.
C206.1-PO2	Medium correlation is given, since understanding and solving the Electric Field problems in a given co-ordinate system and their derivations need better problem analysis skills and first principles of mathematics and science.
C206.2-PO2	Medium correlation is given, since understanding and solving Gauss divergence theorem potential need better problem analysis skills and first principles of mathematics and science.
C206.3-PO2	Medium correlation is given, since understanding and solving the problems related to Laplace's equations and basic concepts of magnetic fields need better problem analysis skills and first principles of mathematics and science.
C206.4-PO2	Medium correlation is given, since understanding and solving problems related to stokes theorem and Magnetic forces need better problem analysis skills and first principles of mathematics and science.
C206.5-PO2	Medium correlation is given, since understanding and solving Maxwell's equations for varying fields and the wave propagation derivations need better problem analysis skills and first principles of mathematics and science.
C206.1 -PO3	Weak correlation is given, since explaining and solving Electric Field related problems in a given co-ordinate system require certain level of knowledge of designing solutions considering public safety and environmental issues.
C206.2 -PO3	Weak correlation is given, since explaining and solving Gauss divergence theorem and potential some problems require certain level of knowledge of designing solutions considering public safety and environmental issues.
C206.3 -PO3	Weak correlation since explaining and solving problems related to Laplace's equations and basic concepts of magnetic fields require certain level of knowledge of designing solutions considering public safety and environmental issues.
C206.4 -PO3	Weak correlation is given, since explaining and solving problems related to stokes theorem and Magnetic forces require certain level of knowledge of designing solutions considering public safety and environmental issues.
C206.5-PO3	Weak correlation is given, since explaining and solving some problems require certain level of knowledge of designing solutions considering public safety and environmental issues.
C206-PO8	A weak correlation is given, as we follow ethics in our behavior, while delivering the

	lecture, maintenance in classrooms conducting exams etc. so, definitely we cultivate professionalism indirectly.
C206-PO10	As communication in relation to complex engineering problems is done through exams and continuous evaluations of the course hence correlated to weak level as only syllabus related concepts are communicated.
C206-PO12	Weak correlation as one needs to have the knowledge of behavior of charges, fields and wave propagation.

## VII. Justification of CO-PSO Mapping :

Mapping	Justification
C206.1-PSO1	A medium correlation is given, as understanding of concepts of charges, force and electric field and applying them to various areas like communication, Digital & analog devices will enhance the basics of Electronics & Communication Engineering.
C206.2-PSO1	A medium correlation is given, as to understand the concepts of gauss law, divergence of electrostatics and applying them to various areas like communication, Digital & analog devices will enhance the basics of Electronics & Communication Engineering.
C206.3-PSO1	A medium correlation is given, as to understand the concepts of potential, Laplace's equation, Poisson's equation and applying them to various areas like VLSI, communication, Digital & analog devices will enhance the basics of Electronics & Communication Engineering.
C206.4-PSO1	A medium correlation is given, as to understand the concepts of magnetostatics and forces applying them to various areas like communication, Digital & analog devices will enhance the basics of Electronics & Communication Engineering.
C206.5-PSO1	A medium correlation is given, as to understand the concepts of time varying fields and wave propagation and applying them to various areas like communication, Digital & analog devices will enhance the basics of Electronics & Communication Engineering.
C206.1-PSO2	A weak correlation is given, as understanding of concepts of charges, force and electric field and applying them to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive cost effective and appropriate solutions happens in some projects only.
C206.2-PSO2	A weak correlation is given, as to understand the concepts of gauss law, divergence of electrostatics and applying them to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive cost effective and appropriate solutions happens in some projects only.
C206.3-PSO2	A weak correlation is given, as to understand the concepts of potential, Laplace's equation, Poisson's equation and applying them to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive cost effective and appropriate solutions happens in some projects only.
C206.4-PSO2	A weak correlation is given, as to understand the concepts of magnetostatics and forces applying them to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive cost effective and appropriate solutions happens in some projects only.
C206.5-	A weak correlation is given, as to understand the concepts of time varying fields and

PSO2	wave propagation and applying them to solve complex Electronics and Communication Engineering problems, using latest hardware and software tools, along with analytical skills to arrive cost effective and appropriate solutions happens in some projects only.

### 6. PSO Attainment for the Entire Course:

CO	PSO1	PSO2
Attainment Level	0.91	0.57

PSOs attainment value for the present course = (Mapped value \* CO attainment average)/3

### 7. Target Attainment:

Median of median of previous three years university results of SEE has been taken to set bench mark. If the attained value is greater than or equal to initial target value, then for next subsequent years (2018-19) attained value is taken as the set target. If the attained value is less than set target then the same set target is continued for the next subsequent years.

Set Target Value (ITV)	1.74
Attained Value	1.36
New Target Level for the next Exam	1.74

### 8. Course Coordinator Remarks:

S. No.	Observations	Comments
1	<b>Impact of Delivery Methods</b>	Delivery methods are satisfactory. Pedagogy used to deliver lectures is quite satisfactory. But overall attainment of all course outcomes is moderate as it is observed in CO attainment table. More practice problems shall be given as home work on previous question paper problems and some tutorial classes are required to clarify ambiguities of students.
2	<b>Course Outcome Attainment</b>	Overall Attainment of all course outcomes (CIE+SEE) is more than 50% on 1-3 performance scale as observed CO attainment table. But attainment level of COs is less than 2. To improve attainment level course outcomes following activates are to be implemented. <ul style="list-style-type: none"> <li>Tutorial/Remedial classes are to be conducted to explain concepts in simpler way by one to one interaction to weaker/slow learners.</li> <li>Home assignments are to be given to improve hands on experience to solve more numerical so appreciate/understand problem and solution to it. Verification and suggestions of the same in front of the students/slow learners.</li> </ul>

<b>3</b>	<b>Scope for Improvement</b>	To enhance the attainment below mentioned activities can be suggested. <ul style="list-style-type: none"> <li>• Animated videos to clarify concepts of divergence, curl and wave propagation equation can be done.</li> <li>• Equations can be displayed in the class room in chart to help students to remember the concepts.</li> </ul>

## Instructions:

- The course coordinator should manually enter correlated IA questions with mapped COs
- The course coordinator should manually enter correlated assignments with mapped COs
- Based on the previous three assessment years course coordinator/faculty has to set the target level for course attainment
- Mapped POs must be entered manually in IA Assessment Sheet, Assignment Assessment Sheet and CO Attainment Sheet

## **FACULTY COURSE ASSESSEMENT REPORT(FCAR)**

**Course Coordinator:** Prof. M. P. Yanagimath

**Class Strength:**23

**Semester:** V

**Subject:** Microcontroller

**Code:** 17EE52

### **I. Program Outcomes (POs):** Engineering Graduates will be able to:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as; being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## II. Program Specific Outcomes (PSOs):

The graduates of the program will be able to;

PSO1	Apply knowledge & competencies to analyze & design electrical & electronics circuits, control and power systems, machines & industrial drives.
PSO2	Use software/hardware tools for the design, simulation and analysis of electrical and electronics systems.

## III. Course Outcomes (COs): The student, after successful completion of the course, will be able to:

CO	Description	Mapped POs	RBTL
C302.1	Discuss the history, features, internal architecture and addressing modes of 8051.	1.2.3.8.10.12	L1,L2,L3,L4
C302.2	Write assembly level program using arithmetic, logic, jump and call instructions.	1.2.3.8.10.12	L1,L2,L3,L4
C302.3	Develop 8051C programs for time delay, I/O, logic, data conversion/serialization and timer operation.	1.2.3.8.10.12	L1,L2,L3,L4
C302.4	Develop 8051 serial port and interrupt programming in assembly and C.	1.2.3.8.10.12	L1,L2,L3,L4
C302.5	Interface 8051 with real-world devices such as LCD's, keyboards, ADC, DAC chips, sensors, motor control devices and with 8255.	1.2.3.8.10.12	L1,L2,L3,L4

**VI. Justification of CO-PO Mapping:**

Mapping	Justification
C302.1-PO1	A strong correlation since explaining pin configuration and memory organization requires a certain level of knowledge of mathematics and engineering sciences.
C302.1-PO2	A medium correlation since to identify the use of microcontroller to solve complex engineering problem student require a certain level of problem analysis skills.
C302.1-PO8	A low correlation since to program microcontroller for various applications it is necessary to follow norms of engineering practice.
C302.1-PO10	A low correlation since to explain the use of microcontroller for various applications by interfacing different peripherals to the community it is necessary to write effective reports.
C302.1-PO12	A low correlation since programming skills of microcontroller will make students to engage in independent and life-long learning in the broadest context of technological change.
C302.2-PO1	A strong correlation since programming arithmetic and logical instructions microcontroller will make students to engage in independent and life-long learning in the broadest context of technological change.
C302.2-PO2	A medium correlation since to identify type of instruction used arithmetic and logical operations based on addressing modes requires a certain level of problem analysis skills.
C302.2-PO3	A low correlation since to solve complex engineering problem using arithmetic and logical instructions microcontroller student must correct program that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
C302.2-PO8	A low correlation since to program microcontroller for various applications it is necessary to follow norms of engineering practice.
C302.2-PO10	A low correlation since programming skills of microcontroller will make students to engage in independent and life-long learning in the broadest context of technological change.
C302.2-PO12	A low correlation since programming skills of microcontroller will make students to engage in independent and life-long learning in the broadest context of technological change.
C302.3-PO1	A strong correlation since explaining the concept of delay and timer requires a certain level of knowledge of mathematics and engineering sciences.

C302.3-PO2	A medium correlation since to identify type of pins those are used for timer delay microcontroller requires a certain level of problem analysis skills.
C302.3-PO3	A low correlation since to solve complex engineering problem using microcontroller student must choose the required hardware to meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
C302.3-PO8	A low correlation since to program microcontroller for various applications by interfacing different peripherals it is necessary to follow norms of engineering practice.
C302.3-PO10	A low correlation since to explain the use of microcontroller for various applications by interfacing different peripherals to the community it is necessary to write effective reports.
C302.3-PO12	A low correlation since programming skills of microcontroller with delay will make students to engage in independent and life-long learning in the broadest context of technological change.
C302.4-PO1	A strong correlation since explaining the concept interrupts and serial communication requires a certain level of knowledge of mathematics and engineering sciences.
C302.4-PO2	A medium correlation since to write source code for applications that use I/O ports, timer and interrupts requires a certain level of problem analysis skills.
C302.4-PO3	A low correlation since to solve complex engineering problem using interfacing student must choose the required hardware to meet the specified needs timer and interrupts with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
C302.4-PO8	A low correlation since to program microcontroller for various applications using timer by interfacing different peripherals it is necessary to follow norms of engineering practice.
C302.4-PO10	A low correlation since to explain the use of timer and I/O ports of microcontroller for various applications by interfacing different peripherals to the community it is necessary to write effective reports.
C302.4-PO12	A low correlation since programming skills of microcontroller with timer and interrupt students will engage in independent and life-long learning in the broadest context of technological change.
C302.5-PO1	A strong correlation since to explain concept of microcontroller interfacing applications students requires a certain level of knowledge of mathematics and engineering sciences.
C302.5-PO2	A medium correlation since to write source code for LCD,DAC and ADC interfacing with microcontroller students requires a certain level of problem analysis skills.
C302.5-PO8	A low correlation since to program 8051 microcontroller for different applications using different interfacing devices it is necessary to follow norms of engineering practice.
C302.5-PO10	A low correlation since to explain the 8051microcontroller for various applications by interfacing different peripherals to the community it is necessary to write effective reports.
C302.5-PO12	A low correlation since programming 8051 microcontroller for different applications students will engage in independent and life-long learning in the broadest context of technological change.

## VII. Justification of CO-PSO Mapping :

Mapping	Justification
C302.1-PSO1	A strong correlation since the knowledge of programming using microcontroller is very much essential electronics systems..
C302.2-PSO1	A strong correlation since the knowledge of different type of instructions to write program using microcontroller is very much essential electronics systems..
C302.3-PSO1	A strong correlation since the knowledge of I/O operation in microcontroller is very much essential electronics systems.
C302.4-PSO1	A strong correlation since the knowledge of serial communication and interrupt in microcontroller is very much essential electronics systems.
C302.5-PSO1	A strong correlation since the knowledge of interfacing in microcontroller is very much essential electronics systems.

### 6. PSO Attainment for the Entire Course:

CO/PSO	PSO1	PSO2
C302	1.63	-

PSOs attainment value for the present course = (Mapped value \* CO attainment average)/3

### PSO Attainment Through Direct Assessment

#### 7. Target Attainment:

As the course is revised, CO attainment target is taken as 2

Set Target Value (ITV)	1.5
Attained Value	1.63
New Target Level for the next Exam	1.63

### CO Attainment for the Course

### 8. Course Coordinator Remarks:

S. No.	Observations	Comments
1	Impact of Delivery Methods	Delivery methods are satisfactory. Pedagogy used to deliver lectures is quite satisfactory.
2	Course Outcome Attainment	Overall attainment of all course outcomes is moderate as it is observed in CO attainment table.
3	Scope for Improvement	Attainment of CO2, 3, 8,10 & CO12 need to be improved.
4	Additional comments (if any)	Nil

### X. INDIRECT ASSESSMENT OF PO & PSO THROUGH COURSE EXIT SURVEY (CES)

## **FACULTY COURSE ASSESSEMENT REPORT(FCAR)**

**Course Coordinator:** Prof: Amit. U. Neshti

**Class Strength:** 59

**Semester:** V

**Subject:** Renewable energy sources

**Code:** 15EE563

### **I. Program Outcomes (POs):** Engineering Graduates will be able to:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## II. Program Specific Outcomes (PSOs):

The graduates of the program will be able to;

PSO1	Apply knowledge & competencies to analyze & design electrical & electronics circuits, control and power systems, machines & industrial drives.
PSO2	Use software/hardware tools for the design, simulation and analysis of electrical and electronics systems.

## III. Course Outcomes (COs): The student, after successful completion of the course, will be able to:

CO	Description	Mapped POs	RBTL
C311.1:	Discuss causes of energy scarcity and its solution, Development, Classification and Availability of Renewable Energy and also Brief the Energy from sun.	PO1,PO2,PO5,PO8	L4
C311.2:	Discuss types of solar collectors, their configurations, solar cell system, its characteristics and their applications.	PO1,PO2,PO5,PO8	L3,L4
C311.3:	Discuss generation of energy from hydrogen, wind, geothermal system, solid waste and agriculture refuse .	PO1,PO2,PO5,PO8	L2
C311.4:	Discuss production of energy from biomass, biogas and Tidal energy .	PO1,PO2,PO5,PO8	L3,L4
C311.5:	Discuss power generation from sea wave energy and ocean thermal energy .	PO1,PO2,PO5,PO8	L3,L4

#### VI. Justification of CO-PO Mapping:

Mapping	Justification
C311.1-PO1	A medium correlation because able to extract science and engg science but not able to engg specialization (Engineering knowledge) to solve Complex engg problem.
C311.1-PO2	A medium correlation because able to extract science and engg science but not able to engg specialization (Engineering knowledge) to solve Complex engg problem.
C311.1-PO5	A low correlation because difficulty in prediction and modeling to complex engineering activities with an understanding of the limitations.
C311.1-PO8	A medium correlation because not able to commit to professional ethics and responsibilities and norms of the engineering practice.
C311.2-PO1	A medium correlation because able to discuss applications of Transformers but not able to apply Engineering knowledge to solve Complex engg problem.
C311.2-PO2	A medium correlation since because able to discuss applications of Transformers but not able to analyze problem to solve Complex engg problem.
C311.2-PO5	A low correlation because difficulty in prediction and modeling to complex engineering activities with an understanding of the limitations.
C311.2-PO8	A medium correlation because not able to commit to professional ethics and responsibilities and norms of the engineering practice.
C311.3-PO1	A medium correlation because able to explain fundamentals of DC and AC Generators but not able to apply Engineering knowledge to solve Complex engg problem..
C311.3-PO2	A medium correlation since because able to explain fundamentals of DC and AC Generators but not able to analyze problem to solve Complex engg problem
C311.3-PO5	A low correlation because difficulty in prediction and modeling to complex engineering activities with an understanding of the limitations.
C311.3-PO8	A medium correlation because not able to commit to professional ethics and responsibilities and norms of the engineering practice.
C311.4-PO1	A High correlation since able to apply Engineering knowledge to solve Complex engg problem
C311.4-PO2	A High correlation since able to analyze problem to solve Complex engg problem
C311.4-PO5	A low correlation because difficulty in prediction and modeling to complex engineering activities with an understanding of the limitations.
C311.4-PO8	A medium correlation because not able to commit to professional ethics and responsibilities and norms of the engineering practice.
C311.5-PO1	A High correlation since able to apply Engineering knowledge to solve Complex engg problem
C311.5-PO2	A High correlation able to analyze problem to solve Complex engg problem
C311.5-PO5	A low correlation because difficulty in prediction and modeling to complex engineering activities with an understanding of the limitations.
C311.5-PO8	A medium correlation because not able to commit to professional ethics and responsibilities and norms of the engineering practice.

## VII. Justification of CO-PSO Mapping :

Mapping	Justification
(C311.1 - C311.5)-PSO1	A high correlation because able to demonstrate the knowledge of renewable energy source.

## IX. DIRECT ASSESSMENT OF COs, POs & PSOs ATTAINMENT

### Teaching Methodology:

- Lecture by Teacher
- PPT or Online demo etc.

### Assessment Tools:

- Continuous assessment
- Laboratory experiments
- End semester exam

### 1. Assessment through Assignment:

A: Appeared R: Reached Low =1 (50-59 %) Medium =2 (60-69 %) High =3 (above 70 %)

COs	Assignment-1		Assignment-2		Assignment-3		Assignment-4		Assignment-5		Attainment level of CO in Percentage	Attainment level of CO	Mapped PO

## **FACULTY COURSE ASSESSEMENT REPORT(FCAR)**

**Course Coordinator:** Prof. Hemalata R Zinage

**Class Strength:**47

**Semester:** VIII

**Subject:** Power System Operation & Control

**Code:** 15EE81

**I. Program Outcomes (POs):** Engineering Graduates will be able to:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## II. Program Specific Outcomes (PSOs):

The graduates of the program will be able to;

PSO1	Apply knowledge & competencies to analyze & design electrical & electronics circuits, control and power systems, machines & industrial drives.
PSO2	Use software/hardware tools for the design, simulation and analysis of electrical and electronics systems.

## III. Course Outcomes (COs): The student, after successful completion of the course, will be able to:

CO	Description	Mapped POs	RBTL
C415.1	Describe various levels of controls in power systems, the vulnerability of the system, components, architecture and configuration of SCADA and solve unit commitment problems	PO1,PO2,PO3,PO4,PO5 PO8,PO10,PO12	L3
C415.2	Explain issues of hydrothermal scheduling and solutions to hydro thermal problems	PO1,PO2,PO3,PO4,PO5 PO8,PO10,PO12	L3,L4
C415.3	Explain basic generator control loops, and develop & analyze mathematical models of Automatic Load Frequency Control	PO1,PO2,PO3,PO4,PO5 PO8,PO10,PO12	L3,L4
C415.4	Explain automatic generation control, voltage and reactive power control in an interconnected power system.	PO1,PO2,PO3,PO4,PO5 PO8,PO10,PO12	L3,L4
C415.5	Explain reliability, security, contingency analysis, state estimation and related issues of power systems.	PO1,PO2,PO3,PO4,PO5 PO8,PO10,PO12	L3,L4

**VI. Justification of CO-PO Mapping:**

Mapping	Justification
C415.1-PO1	A strong correlation since explaining the concept of mathematical modeling of AVR & ALFC loops requires the knowledge of mathematics and electrical engineering sciences.
C415.1-PO2	A strong correlation forming the mathematical modeling of AVR & ALFC loops requires a certain level of problem analysis skills based on literature research. However, first principles of mathematics, science are required.
C415.1-PO3	A medium correlation since forming the mathematical models of AVR & ALFC loops requires knowledge on designing/developing solutions considering public safety and environmental issues.
C415.1-PO4	A low correlation since explaining the concept requires design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
C415.1-PO5	A low correlation since explaining the concept requires knowledge about usage of modern engineering /software tools.
C415.1-PO8	A medium correlation since after studying these concept students require to apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
C415.1-PO10	A moderate correlation since the study of various levels of controls in power systems, the vulnerability of the system, components, architecture and configuration of SCADA and solve unit commitment problems may contribute for improvement of Verbal/Non-Verbal communication.
C415.1-PO12	A low correlation since understanding various levels of controls in power systems, the vulnerability of the system, components, architecture and configuration of SCADA and solve unit commitment problems will help to continue the learning process.
C 415.2-PO1	A strong correlation since explaining the concept of controlling voltage and reactive power requires the knowledge of mathematics and electrical engineering sciences.
C415.2-PO2	A medium correlation since explaining the concept requires a certain level of problem analysis skills based on literature research. However, first principles of mathematics, science are required.
C415.2-PO3	A medium correlation since explaining the concept require a certain level of knowledge on designing / developing solutions considering public safety and environmental issues
C415.2-PO4	A low correlation since explaining the concept requires design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
C415.2-PO5	A low correlation since explaining the concept requires knowledge about usage of modern engineering /software tools.

C415.3-PO12	A low correlation since understanding basic generator control loops, and develop & analyze mathematical models of Automatic Load Frequency Control will help to continue the learning process.
C415.4-PO1	A strong correlation since explaining the concept require the knowledge of mathematics and electrical engineering sciences
C415.4-PO2	A medium correlation since explaining the concept requires a certain level of problem analysis skills based on literature research. However, first principles of mathematics, science are required.
C415.4- PO3	A medium correlation since explaining the concept require a certain level of knowledge on designing / developing solutions considering public safety and environmental issues
C415.4- PO4	A low correlation since explaining the concept requires design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
C415.4-PO5	A low correlation since explaining the concept requires knowledge about usage of modern engineering /software tools.
C415.4-PO8	A medium correlation since after studying these concept students require to apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
C415.4-PO10	A moderate correlation since the automatic generation control, voltage and reactive power control in an interconnected power may contribute for improvement of Verbal/Non-Verbal communication.

C415.4-PO12	A low correlation since understanding automatic generation control, voltage and reactive power control in an interconnected power will help to continue the learning process.
C415.5- PO1	A strong correlation since explaining the concept require the knowledge of mathematics and electrical engineering sciences.
C415.5- PO2	A medium correlation since explaining the concept requires a certain level of problem analysis skills based on literature research. However, first principles of mathematics, science are required
C415.5- PO3	A medium correlation since explaining the concept require a certain level of knowledge on designing / developing solutions considering public safety and environmental issues.
C415.5- PO4	A low correlation since explaining the concept requires design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
C415.5-PO5	A low correlation since explaining the concept requires knowledge about usage of modern engineering /software tools.
C415.5-PO8	A medium correlation since after studying these concept students require to apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

#### VII. Justification of CO-PSO Mapping :

Mapping	Justification
C415-PSO1	A strong correlation since after studying power system operation & control students will develop an ability to demonstrate knowledge & competencies to analyze & design electrical power systems.
C415-PSO2	A low correlation since after studying the various concepts of power system operation and control students will develop an ability to use software tools for the design, simulation and analysis of electrical power systems to some extent.

#### VIII. Bench Mark Setting

As the course is revised, CO attainment target is taken as 2.

## IX. DIRECT ASSESSMENT OF COs, POs & PSOs ATTAINMENT

### Teaching Methodology:

- Lecture by Teacher
- PPT or Online demo etc.

### Assessment Tools:

- Continuous assessment
- Laboratory experiments
- End semester exam

### 1. Assessment through Assignment:

A: Appeared R: Reached Low =1 (50-59 %) Medium =2 (60-69 %) High =3 (above 70 %)

## **FACULTY COURSE ASSESSEMENT REPORT (FCAR)**

**Course Coordinator: Prof: S A Goudadi** **Class Strength:62**  
**Semester: VI A** **Subject: Finite Element Methods** **Code: 15ME61**

### **I. Program Outcomes (POs):** Engineering Graduates will be able to:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## II. Program Specific Outcomes (PSOs):

The graduates of the program will be able to;

PSO1:	Implement the basic Mechanical Engineering knowledge to solve societal and industrial problems.
PSO2:	Design and Analyze basic Mechanical systems using relevant tools and techniques.
PSO3:	Understand and address current issues of industries through industry institute interaction and alumni social networks.

## III. Course Outcomes (COs): The student, after successful completion of the course, will be able to:

CO	Description	Mapped POs	RBTL
C315.1	Understand the concepts behind formulation methods in FEM and Choose interpolation polynomial equation for simplex elements	PO1,PO2,PO3,PO6, PO8,PO11,PO12	L2
C315.2	Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses.	PO1,PO2,PO3,PO6, PO8,PO11,PO12	L3
C315.3	Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts	PO1,PO2,PO3,PO6, PO8,PO11,PO12	L3

## VI. Justification of CO-PO Mapping:

Mapping	Justification
C315.1-PO1	A strong correlation is given, as to understand the concepts behind formulation methods in FEM and choose interpolation polynomial equation for simplex elements requires fundamentals of mathematics and engineering to solve problems of different structures.
C315.2-PO1	A strong correlation is given, as to develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses requires good knowledge of application of matrices in mathematics and engineering properties fundamentals to solve problems.
C315.3-PO1	A strong correlation is given, so as to develop element characteristic equation and solve the global equation of FEA for beams and a circular shaft requires good knowledge of application fundamentals of mathematics and engineering to solve problems on beams and shafts.
C315.4-PO1	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow requires application of fundamentals of matrices and thermal engineering to solve complex problems on fluid flow and heat transfer.
C315.5-PO1	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems requires knowledge of higher order mathematics and engineering fundamentals to solve dynamic and axisymmetric problems.
C315.1-PO2	A strong correlation is given so as to Understand the concepts behind formulation methods in FEM and choose interpolation polynomial equation for simplex elements requires a good knowledge of system components that meet the specified needs.
C315.2-PO2	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses requires a good knowledge of design of components with appropriate consideration for the safety and societal considerations.
C315.3-PO2	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts requires a good knowledge of design system components that meet the specified needs with appropriate consideration for the safety and societal considerations.
C315.4-PO2	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow requires a good knowledge of design system components with safety and societal considerations
C315.5-PO2	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems requires a good knowledge of design of axis symmetric and dynamic components that meet the specified needs of the society.
C315.1-PO3	A strong correlation is given so as to Understand the concepts behind formulation methods in FEM and Choose interpolation polynomial equation for simplex elements requires a good knowledge of design solutions for complex engineering problems to meet the specified needs with appropriate consideration for the public health and safety considerations.
C315.2-PO3	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses requires a good knowledge of design solutions for bars and trusses problems to meet the specified needs with appropriate consideration for the public health and safety considerations.

C315.3-PO3	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts involves design solutions for complex equipments to meet the specific applications considering the public health and safety considerations.
C315.4-PO3	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow involves design considerations and solutions for complex engineering problems to meet the specified needs.
C315.5-PO3	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems require the knowledge of design considerations which will help to the society.
C315.1-PO6	A medium correlation is given so as to Understand the concepts behind formulation methods in FEM and Choose interpolation polynomial equation for simplex elements require the moderate knowledge of professional engineering practice with safety standards..
C315.2-PO6	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses application in engineering practice with the assess to safety issue and the professional engineering solutions.
C315.3-PO6	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts require the application of reasoning informed by the contextual knowledge to assess safety issue and the consequent responsibilities relevant to the professional engineering practice.
C315.4-PO6	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow applies to the application of knowledge to assess safety issue and the responsibilities relevant to the professional engineering practice.
C315.5-PO6	A low correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems require the application of limited knowledge to assess safety issue and the consequent responsibilities relevant to the professional engineering practice.
C315.1-PO8	A medium correlation is given so as to Understand the concepts behind formulation methods in FEM and choose interpolation polynomial equation for simplex elements and related applications requires professional ethics and principles in developing the simplex elements.
C315.2-PO8	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses requires a ethical principles and commit to professional ethics and responsibilities in developing these elements.
C315.3-PO8	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts related applications requires a knowledge of engineering norms and standards in developing beams and shafts.
C315.4-PO8	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow requires a ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice
C315.5-PO8	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems requires a fundamentals of ethical principles and professional ethics and responsibilities and norms.
C315.1-PO11	A medium correlation is given so as to Understand the concepts behind formulation methods in FEM and Choose interpolation polynomial equation for simplex elements requires the knowledge of Demonstration of simplex elements in their particular work.

C315.2-PO11	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses requires the limited knowledge and understanding of the engineering principles in their needy work.
C315.3-PO11	A medium correlation is given as limited engineering and management principles knowledge is required in developing element characteristic equation and solve the global equation of FEA for beams and circular shafts.
C315.4-PO11	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow requires understanding of the engineering and management principles and apply these to one's own work
C315.5-PO11	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems requires to Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work
C315.1-PO12	A medium correlation is given so as to Understand the concepts behind formulation methods in FEM and choose interpolation polynomial equation for simplex elements requires ability to engage in learning in their independent work or in professional practice
C315.2-PO12	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and a truss requires the knowledge to develop such equations in engineering practice.
C315.3-PO12	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts requires to learn similar type of applications in engineering practice.
C315.4-PO12	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow requires in independent and life-long learning in the broadest context of technological changes to their related work.
C315.5-PO12	A medium correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems requires ability to engage in independent and life-long learning in developing such type of equipments.

## VII. Justification of CO-PSO Mapping :

Mapping	Justification
C315.1-PSO1	A strong correlation is given as to Understand the concepts behind formulation methods in FEM and Choose interpolation polynomial equation for simplex elements requires to apply basic knowledge of Mechanical Engineering in their work
C315.2-PSO1	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses requires to apply basic knowledge of Mechanical Engineering in various practical fields to solve societal problems by engaging themselves in various projects
C315.3-PSO1	A strong correlation is given so as to explain the Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts requires knowledge of various practical fields to solve societal problems.
C315.4-PSO1	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow requires to apply basic knowledge of engineering in solving societal problems by engaging themselves in their work.
C315.5-PSO1	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems requires to apply

	basic knowledge of Mechanical Engineering in various practical fields to solve societal problems by engaging themselves in various projects
C315.1-PSO2	A strong correlation since to Understand the concepts behind formulation methods in FEM and Choose interpolation polynomial equation for simplex elements requires to analyze and design basic mechanical system using relevant tools and techniques.
C315.2-PSO2	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses requires analyzing and designing basic mechanical system using relevant tools and techniques.
C315.3-PSO2	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts requires the knowledge of analysis and design of basic mechanical system using modern tools and techniques.
C315.4-PSO2	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow requires analyzing and designing basic mechanical systems.
C315.5-PSO2	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and a dynamic problem requires designing and analyzing mechanical systems using relevant tools and techniques.
C315.1-PSO3	A strong correlation since to Understand the concepts behind formulation methods in FEM and Choose interpolation polynomial equation for simplex elements requires to resolve contemporary issues of industries through industry institute interaction and alumni social networks
C315.2-PSO3	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA elements such as bars and trusses requires to resolve contemporary issues in their work.
C315.3-PSO3	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for beams and circular shafts helps to solve their problems of industries through industry institute interaction and alumni social networks in their related work.
C315.4-PSO3	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for 1D heat transfer and fluid flow requires to resolve problems related to such applications in industries.
C315.5-PSO3	A strong correlation is given so as to Develop element characteristic equation and solve the global equation of FEA for axis symmetric and dynamic problems requires to resolve contemporary issues of industries through industry institute interaction and alumni social networks.

## IX. DIRECT ASSESSMENT OF COs, POs & PSOs ATTAINMENT

### Teaching Methodology:

- Lecture by Teacher
- PPT or Online demo etc.

### Assessment Tools:

- Continuous assessment
- Laboratory experiments
- End semester exam

### 1. CO Attainment through Assignment:

A: Appeared      R: Reached      Low =1 (50-59 %)      Medium =2 (60-69 %)      High =3 (above 70 %)

COs	Assignment-1		Assignment-2		Assignment-3		Assignment-4		Assignment-5		Attainment level of CO in Percentage	Attainment level of CO	Mapped PO	Mapped PSO

## 7. Target Attainment:

CO Attainment for the Set Target	
Set Target CO Value	Attained CO Value
2.16	1.86

Median of median of previous three years university results of SEE has been taken to set bench mark. If the attained value is greater than or equal to initial target value, then for next subsequent years attained value is taken as the set target. If the attained value is less than set target then the same set target is continued for the next subsequent years.

Set Target Value (ITV)	2.16
Attained Value	1.86
New Target Value for the next Exam	2.16

## 8. Course Coordinator Remarks:

S. No.	Observations	Comments
1	<b>Impact of Delivery Methods</b>	Delivery methods are satisfactory. Pedagogy used to deliver lectures is quite satisfactory. But overall attainment of all course outcomes is moderate as it is observed in CO attainment table. More practice problems shall be given as home work on previous question paper problems and some tutorial classes are required to clarify ambiguities of students.
2	<b>Course Outcome Attainment</b>	Overall Attainment of all course outcomes (CIE+SEE) is more than 50% on 1-3 performance scale as observed CO attainment table. But attainment level of COs 1, 2&5 is less than 2 as compared to other remaining COs. To improve attainment level course outcomes C315.1, C315.2&C315.5 following activates are to be implemented. <ul style="list-style-type: none"> <li>• Tutorial/Remedial classes are to be conducted to explain concepts in simpler way by one to one interaction to weaker/slow learners.</li> <li>• Home assignments are to be given to improve hands on experience to solve more numerical so appreciate/understand problem and solution to it. Verification and suggestions of the same in front of the students/slow learners.</li> </ul>
3	<b>Scope for Improvement</b>	As this subject is prerequisite for sequel of subjects like design of machine elements for a design engineer, below mentioned activities can be suggested. <ul style="list-style-type: none"> <li>• Animated videos to clarify concepts of stress strain analysis done using modern analysis soft tools.</li> <li>• Videos of advanced application oriented problems with solution</li> <li>• Application based problems of design; thermal area shall be solved to have hands on experience for better understanding concepts of use finite element methods.</li> </ul>
4	<b>Additional Comments (if any)</b>	Real world small problems can be given as mini project work using industrial/academic version FEM software.

## **FACULTY COURSE ASSESSEMENT REPORT (FCAR)**

**Course Coordinator: Prof: D N Inamdar**

**Class Strength: 61**

**Semester: VI B**

**Subject: DOME II**

**Code: 15ME64**

### **I. Program Outcomes (POs): Engineering Graduates will be able to:**

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **II. Program Specific Outcomes (PSOs):**

The graduates of the program will be able to;

PSO1:	Implement the basic Mechanical Engineering knowledge to solve societal and industrial problems.
PSO2:	Design and Analyze basic Mechanical systems using relevant tools and techniques.
PSO3:	Understand and address current issues of industries through industry institute interaction and alumni social networks.

**III. Course Outcomes (COs):** The student, after successful completion of the course, will be able to:

CO	Description	Mapped POs	Mapped PSOs	RBTL
C318.1	Design and analyze behavior of stresses in curved beams and compound cylinders.	PO1,PO2,PO3,PO6, PO8,PO11,PO12	PSO1-PSO3	L3
C318.2	Design belts, wire ropes and chain drives & springs for Mechanical systems	PO1,PO2,PO3,PO6, PO8,PO11,PO12	PSO1-PSO3	L3
C318.3	Design different types of gears and simple gear boxes for different applications.	PO1,PO2,PO3,PO6, PO8,PO11,PO12	PSO1-PSO3	L3
C318.4	Design brakes and clutches	PO1,PO2,PO3,PO6, PO8,PO11,PO12	PSO1-PSO3	L3
C318.5	Select suitable lubricants and analyze performance of hydrodynamic, hydrostatic and antifriction bearings.	PO1,PO2,PO3,PO6, PO8,PO11,PO12	PSO1-PSO3	L3

Phone: +91-8333-278887, Fax: 278886, Web: [www.hsit.ac.in](http://www.hsit.ac.in), E-mail: [principal@hsit.ac.in](mailto:principal@hsit.ac.in)

Median of median of previous three years university results of SEE has been taken to set bench mark. If the attained value is greater than or equal to initial target value, then for next subsequent years (2018-19) attained value is taken as the set target. If the attained value is less than set target then the same set target is continued for the next subsequent years.

### 9. Course Coordinator Remarks:

S. N.	Observations	Comments
1	Impact of Delivery Methods	Delivery methods are satisfactory. Pedagogy used to deliver lectures is quite satisfactory. But overall attainment of all course outcomes is moderate as it is observed in CO attainment table. More practice problems shall be given as home work on previous question paper problems and some Remedial classes are required to clarify ambiguities of students.
2	Course Outcome Attainment	Overall Attainment of all course outcomes (CIE+SEE) is less than 50% on 1 -3 performance scale as observed CO attainment table. But attainment level of COs 1, 2&5 is less than 1 as compared to other remaining COs. To improve attainment level course outcomes C318.1, C318.2&C318.5 following activates are to be implemented. Tutorial/Remedial classes are to be conducted to explain concepts in simpler way by one to one interaction to weaker/slow learners.
3	Scope for Improvement	As this subject is prerequisite for sequel of subjects like design of machine elements for a design engineer, below mentioned activities can be suggested. Animated videos to clarify concepts of stress strain analysis done using modern analysis soft tools. Videos of advanced application oriented problems with solution Application based problems of design; thermal area shall be solved to have hands on experience for better understanding concepts of use finite element methods.
4	Additional Comments (if any)	Real world small problems can be given as assignment work on machine parts design and detailed drawings of part details with dimensions and assembly drawing using mechanical modeling software.

<b>Semester: IV B</b>	<b>Subject: Fluid Mechanics</b>	<b>Code: 17ME44</b>

### I. **Program Outcomes (POs):** Engineering Graduates will be able to:

- Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## II. Program Specific Outcomes (PSOs):

PSO1:	Able to apply the basic principles of Mechanical Engineering in various practical fields to solve societal problems by engaging themselves in many state/national level projects.
PSO2:	Able to analyze and design basic mechanical system using relevant tools and techniques.
PSO3:	Able to resolve contemporary issues of industries through industry institute interaction and alumni social networks.

## III. Course outcomes (COs): The student, after successful completion of the course, will be able to:

CO	Description
C216.1	Define and formulate the properties of fluids, fluid statics and buoyancy of floating and submerged bodies.
C216.2	Understand and apply of basic principles of fluid kinematics and dynamics to solve engineering problems
C216.3	Formulate the correlations for velocity and shear stress distribution and pressure drop for fluid flow problems and to study various losses in the pipe network.
C216.4	Study and formulate aerodynamics for flow over bodies and to group variables to non-dimensional terms for model and prototype
C216.5	Understand CFD and basic equations for compressible flows and their applications

## VI. Justification of CO-PO Mapping:

Mapping	Justification
PO1 & CO: C216.1- C216.5	All 5 COs ensures the fluid mechanics fundamentals & engineering knowledge and required applied mathematics. Hence all COs C216.1-C216.5 have strongly relation with PO1. To attain PO1, the relevant knowledge of fluid properties and formulations are required to resolve complex engineering problems.
PO2 & CO:C216.1- C216.5	Analysis of complex engineering problems and to reach sustainable solutions & conclusions, the understanding & formulating of fluid properties, statics and dynamics for compressible and incompressible flows are necessary. Hence all 5 CO: C216.1-C216.4 are strongly correlate with the PO2.
PO3 & CO:C216.1- C216.5	Design of engineering systems & processes, which consider the public health, safety and society and environment, requires the understanding and formulating of fluid properties, aerodynamics, and pressure and velocity distribution and losses in viscous flow structures. Hence all 5 CO: C216.1-C216.5 are moderately correlate with the PO3.
PO4 & CO:C216.1- C216.5	The valid conclusions require research-based knowledge and research methods including design of experiments related to fluid properties, statics and dynamics. Also, the information generated from the above investigations requires data analysis, interpretation and synthesis. As CO: C216.1-C216.3 are emphasis on fundamentals of fluid mechanics, hence, CO: C216.1-C216.3 are low level correlation with the PO4. However, C216.4 & C216.5 emphasis on aerodynamics and compressible flows, hence these correlate moderately with the PO4.
PO5 & CO:C216.1- C216.5	Modeling of complex engineering activities with an understanding of the limitations requires creation, selection and applies of appropriate techniques, resources, and modern engineering and CFD tools including prediction. As CO: C216.1-C216.3 are emphasis on fundamentals of fluid mechanics, hence, CO: C216.1-C216.3 are low level correlation with the PO5. However, C216.4 & C216.5 emphasis on aerodynamics and compressible flows, hence these correlate moderately with the PO5.
PO6 & CO:C216.1, C216.4 & C216.5	The contextual knowledge of fluid properties, statics and buoyancy requires assessing societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice. Hence the CO: C216.1 moderately correlated with the PO6. Whereas the study of importance of aerodynamics and properties and formulation of compressible fluid and their flows are also required for above said purpose, hence C216.4 & C216.5 have low level correlation with the PO6.
PO7 & CO: C216.3 & C216.5	Understanding of aerodynamics and estimation of major and minor losses in flow through pipes and accounting the viscous effects requires for professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. Hence the CO: C216.3 & C216.5 have low level correlation with the PO7.
PO8 & CO:C216.1, C216.4 & C216.5	Understanding of fluid properties and aerodynamics and estimation of losses in pipe flow and practice them with ethics and responsibility is requires. Hence the CO: C216.1, C216.4 & C216.5 have low level correlation with the PO7.

PO9 & CO:C216.1- C216.3	Understanding, formulation and analysis of fluid properties, statics and kinematics and dynamics is required to function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. Hence the CO: C216.1-C216.3 have low level correlation with the PO9.
PO10 & PO11	The PO10 & PO11 emphasis on communication and managerial skills such as presentation, documentation, reporting, demonstration, leadership and coordination of the engineering knowledge and practices. Hence these are not assessed during the interaction of the all 5 COs, therefore these are not mapped with said POs.
PO12 & CO:C216.1- C216.5	The clear elementary knowledge of fluid properties, statics and kinematics and dynamics is required to engage in independent and life-long learning in the broadest context of technological change. Hence the CO: C216.1-C216.4 have low level mapping with the PO12. The learning and applying of modern CFD tool is required to resolve relevant issues of the emerging trends and to excel and sustain in the career. Hence CO216.5 has strong correlation with the PO12.

#### VII. Justification of CO-PSO Mapping (FLUID MECHANICS-10ME46B):

Mapping	Justification
PSO1 & CO:C216.1- C216.5	<p>The design of complex engineering systems comprising the public health, safety and society and environment, requires the knowledge of fluid properties, aerodynamics, and pressure and velocity distribution and losses in viscous flow structures. Hence all 5 CO: C216.1-C216.5 are strongly correlate with the PSO1.</p> <p>Also, the clear elementary knowledge of fluid properties, statics and kinematics and dynamics is important to engage in independent and life-long learning in the broadest context of technological change. Hence the CO: C216.1-C216.5 have strong relation with the PSO1.</p>
PSO2 & CO:C216.1 & C216.2	The learning and applying of modern CFD tool is required to resolve relevant issues of the emerging trends and to excel and sustain in the career. Modeling of complex engineering activities with an understanding of the limitations requires creation, selection and applies of appropriate techniques, resources, and modern engineering and CFD tools including prediction. Understanding, formulation and analysis of fluid properties, statics and kinematics and dynamics is required to function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. Hence the CO: C216.1-C216.5 have moderate relation with the PSO2.
PSO3 & CO:C216.1- C216.5	The solution of contemporary issues of industries requires clear elementary knowledge of fluid properties, statics and kinematics and dynamics and learning and applying of modern CFD tool. Hence the CO: C216.1-C216.5 have moderate relation with the PSO3.

### VIII. Bench Mark Setting

#### Previous Target Attainment:

As per the decision, if the attained value is greater than or equal to initial target value (ITV), then the next bench mark for the subsequent year will be attained value (or whichever is higher). If the attained value is less than the set target (ITV) then the next bench mark will be ITV for the subsequent year attainment.

Set Target Value (ITV)	1.776
Attained Value	1.18
New Target Level for the next Exam	1.776

Here attained value is less than the ITV, hence the benchmark for the current year attainment is ITV itself i.e 1.776

Now ITV=1.776 is the set benchmark for the COs attainment through the CIE & SEE for the current students.

### MEASUREMENT OF COs, POs & PSOs ATTAINMENT

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**II. Program Specific Outcomes (PSOs):**

PSO1:	Understand, design and analyze computer programs in the areas related to Algorithms, System Software, Web design, Bigdata Analytics and Networking.
PSO2:	Make use of modern computer tools for creating innovative career paths to be an entrepreneur and desire for higher studies.

**III. Course outcomes (COs):** The student, after successful completion of the course, will be able to:

C403.1-PO3	A medium correlation as the basic knowledge of machine learning helps to solve the complex engineering problem.
C403.2-PO3	A medium correlation as the basic knowledge of probability and statistics helps to solve the complex engineering problem.
C403.3-PO3	A strong correlation as the basic knowledge of machine learning algorithms helps to solve the complex engineering problem.
C403.1-PO8	A weak correlation since students applies ethical principles while writing programs.
C403.2-PO8	
C403.3-PO8	
C403.1-PO10	A weak correlation since it help students to communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
C403.2-PO10	
C403.3-PO10	
C403.1-PO12	A weak correlation since it contributes weakly in lifelong learning of a student.

## VII. Target Attainment:

The course Machine Learning (15CS73) is introduced first time in the 2015 scheme of the University curriculum, the CO attainment target is set to 1.5. If the attained value is greater than or equal to initial target value, then for next subsequent years (2019-20) attained value is taken as the set target. If the attained value is less than set target then the same set target is continued for the next subsequent years.

Set Target Value (ITV)	1.50
Attained Value	1.42
New Target Level for the Next Exam	1.50

## VIII. Course Coordinator Remarks:

S. No.	Observations	Comments
1	Impact of Delivery Methods	Delivery methods are satisfactory. Pedagogy used to deliver lectures is quite satisfactory. But overall attainment of all course outcomes is moderate as it is observed in CO attainment table. Some tutorial classes are required to clarify ambiguities of students.
2	Course Outcome Attainment	Target level can be achieved by improving the IA performance and semester end examination result with innovative teaching methodologies such as using videos for the real time examples, providing important course materials other than prescribed textbooks, conducting quiz on subject areas etc.
3	Scope for Improvement	Below mentioned activities can be suggested. <ul style="list-style-type: none"><li>• Animated videos to clarify concepts of Machine Learning</li></ul>

## **FACULTY COURSE ASSESSEMENT REPORT (FCAR)**

**Course Coordinator: Prof: A. A. Daptardar**

**Class Strength:49**

**Semester:VI**

**Subject: Operating Systems**

**Code: 15CS64**

### **I. Program Outcomes (POs): Engineering Graduates will be able to:**

- Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **II. Program Specific Outcomes (PSOs):**

PSO1:	Understand, design and analyze computer programs in the areas related to Algorithms, System Software, Web design, Bigdata Analytics and Networking.
PSO2:	Make use of modern computer tools for creating innovative career paths to be an entrepreneur and desire for higher studies.

## VI. Justification of CO-PO Mapping:

Mapping	Justification
C319.1-PO1	A moderate correlation is given, as to demonstrate the need for Operating System and its types requires the basic knowledge of engineering.
C319.2-PO1	A moderate correlation is given, as to explain the multithreaded systems and scheduling algorithms requires the knowledge of mathematics and engineering fundamentals.
C319.3-PO1	A moderate correlation is given, as to illustrate the concept of process synchronization and deadlock which includes Banker's algorithm requires the knowledge of mathematics and engineering fundamentals.
C319.4-PO1	A moderate correlation is given, as to explain the concept of memory management and file system requires the knowledge of mathematics and engineering fundamentals.
C319.5-PO1	A moderate correlation is given, as to explain the different concepts of disk management, protection and Linux system case studies requires the knowledge of mathematics and engineering fundamentals.
C319.1-PO2	A moderate correlation is given, as to demonstrate the need for Operating System and its types is essential for problem identification and solution formulation.
C319.2-PO2	A moderate correlation is given, as to explain the multithreaded systems and scheduling algorithms is essential for problem identification and solution formulation.
C319.3-PO2	A moderate correlation is given, as to illustrate the concept of process synchronization and deadlock which includes Banker's algorithm is essential for problem identification and solution formulation.
C319.4-PO2	A moderate correlation is given, as to explain the concept of memory management and file system is essential for problem identification and solution formulation.
C319.5-PO2	A moderate correlation is given, as to explain the different concepts of disk management, protection and Linux system case studies is essential for problem identification and solution formulation.
C319.1-PO3	A moderate correlation is given, as to demonstrate the need for Operating System and its types is essential during the design/development of solutions to the problems.
C319.2-PO3	A moderate correlation is given, as to explain the multithreaded systems and scheduling algorithms is essential during the design/development of solutions to the problems.
C319.3-PO3	A moderate correlation is given, as to illustrate the concept of process synchronization and deadlock which includes Banker's algorithm is essential during the design/development of solutions to the problems.
C319.4-PO3	A moderate correlation is given, as to explain the concept of memory management and file system is essential is essential during the design/development of solutions to the problems.
C319.5-PO3	A moderate correlation is given, as to explain the different concepts of disk management, protection and Linux system case studies is essential during the design/development of solutions to the problems.
C319.1-PO8	A moderate correlation is given, as to demonstrate the need for Operating System and its types requires knowledge of ethical principles and professional ethics.
C319.2-PO8	A moderate correlation is given, as to explain the multithreaded systems and scheduling algorithms requires knowledge of ethical principles and professional ethics.
C319.3-PO8	A moderate correlation is given, as to illustrate the concept of process synchronization and deadlock which includes Banker's algorithm requires knowledge of ethical principles and professional ethics.

## VII. Target Attainment:

Median of median of previous three years university results of SEE has been taken to set bench mark. If the attained value is greater than or equal to initial target value, then for next subsequent years (2018-19) attained value is taken as the set target. If the attained value is less than set target then the same set target is continued for the next subsequent years.

### VIII. Course Coordinator Remarks:

S. No.	Observations	Comments
1	Impact of Delivery Methods	Delivery methods are satisfactory. Pedagogy used to deliver lectures is quite satisfactory. But overall attainment of all course outcomes is moderate as it is observed in CO attainment table. Some tutorial classes are required to clarify ambiguities of students.
2	Course Outcome Attainment	Overall Attainment of all course outcomes (CIE+SEE) is more than 50% on 1 -3 performance scale as observed CO attainment table. But attainment level of COs 1is less than 2 as compared to other remaining COs. To improve attainment level course outcomes C319.1, following activates are to be implemented. <ul style="list-style-type: none"> <li>Tutorial/Remedial classes are to be conducted to explain concepts in simpler way by one to one interaction to weaker/slow learners.</li> </ul>
3	Scope for Improvement	Below mentioned activities can be suggested. <ul style="list-style-type: none"> <li>Animated videos to clarify concepts of Operating System</li> </ul>

## **FACULTY COURSE ASSESSEMENT REPORT (FCAR)**

**Course Coordinator:** Dr. K. B. Manwade **Class Strength:**34  
**Semester:** VIII **Subject:** User Interface Design **Code:** 17CS832

### **I. Program Outcomes (POs): Engineering Graduates will be able to:**

- Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **II. Program Specific Outcomes (PSOs):**

PSO1:	Understand, design and analyze computer programs in the areas related to Algorithms, System Software, Web design, Bigdata Analytics and Networking.
PSO2:	Make use of modern computer tools for creating innovative career paths to be an entrepreneur and desire for higher studies.

## VI. Justification of CO-PO Mapping:

Mapping	Justification
C418.1-PO1	A medium correlation since explaining the principles of good interface design which require knowledge of engineering sciences.
C418.2-PO1	A medium correlation since explaining the user interface design process which require knowledge of engineering sciences.
C418.3-PO1	A medium correlation since explaining the various aspects of system menus design which require knowledge of engineering sciences.
C418.4-PO1	A medium correlation since explaining the aspects of windows like its characteristics which require knowledge of engineering sciences.
C418.5-PO1	A medium correlation since explaining the Explain types of screen based controls which require knowledge of engineering sciences.
C418.1-PO2	The CO contributes moderately to problem analysis by explaining importance and characteristics of good interface design.
C418.2-PO2	The CO contributes moderately to problem analysis by Explain the user interface design process, characteristics.
C418.3-PO2	The CO contributes moderately for problem analysis by Explain various aspects of system menus and its navigation.
C418.4-PO2	The CO contributes moderately for problem analysis by Explain components, presentation, control and it's working.
C418.5-PO2	The CO contributes moderately for problem analysis by various Explain types of screen based controls.
C418.1-PO3	The CO maps moderately to design and development by explaining characteristics of good user interface design.
C418.2-PO3	The CO maps moderately to design and development by explaining the standards of design process.
C418.3-PO3	The CO maps moderately to design and development by explaining various aspects of system menus and its navigation design.
C418.4-PO3	The CO maps moderately to design and development by explaining the components an presentation window module.
C418.5-PO3	The CO maps moderately to design and development by explaining various types of designs for screen based controls.
C418.1-PO8	The CO explains only principles, importance, characteristics user interface, so contributes weakly to professional ethics and responsibilities.
C418.2-PO8	The CO explains various standards for designing user interface, thus contributes weakly to professional ethics and responsibilities.
C418.3-PO8	The CO explains only requirements for implementation of system menus and its navigation. so contributes weakly to professional ethics and responsibilities.
C418.4-PO8	The CO explains only requirements not ethical principle for implementing window components and its presentation.
C418.5-PO8	The CO explains only types of screen based controls for different types of devices, so contributes weakly to professional ethics and responsibilities.
C418.1-PO10	The CO explain concept, characteristics and importance of user interface and contributes moderately for communication.
C418.2-PO10	The CO contributes moderately for communication as it explains user interface design process and its characteristics and standards.
C418.3-PO10	The CO explains menu and its types and thus contributes moderately for communication.
C418.4-PO10	The CO contributes moderately for communication by explaining windows based controls.

		<b>NBA</b>
		<b>FCAR</b>
		<b>2020-21 (EVEN)</b>

C418.5-PO10	The CO contributes moderately for communication by explaining screen based controls.
C418.1-PO12	The CO explains importance of good interface design and motivates for lifelong learning.
C418.2-PO12	The CO explains standards of user interface design process and motivates for lifelong learning.
C418.3-PO12	The CO explains advantages of menus and types of navigations in the menu and motivates for lifelong learning.
C418.4-PO12	The CO explains types and aspects of windows based systems and motivates for lifelong learning.
C418.5-PO12	The CO explains modern screen based controls and requirement for designing good interface which motivates for lifelong learning.

## VII. Justification of CO-PSO Mapping:

Mapping	Justification
C418.1-PSO1	A medium correlation since CO gives introduction about user interface design which is required for implementation of different software products.
C418.2-PSO1	The required design process for implementation of user interface is explained by CO, so medium correlation between CO and the corresponding PO.
C418.3-PSO1	For GUI based software product the important component is menus and its navigation which explained by the CO, therefore medium correlation.
C418.4-PSO1	A medium correlation since CO explains windows based system and its implementation.
C418.5-PSO1	As per types of devices user interface need to be developed, the CO explains various screen based interfaces therefore medium correlation.
C418.1-PSO2	The CO indicates low correlation to higher studies and for innovative career paths as it guides about characteristics and importance of user interface.
C418.2-PSO2	The CO indicates low correlation to higher studies and for innovative career paths as it explains the design process for different types of devices.
C418.3-PSO2	The CO indicates low correlation to higher studies and for innovative career paths and explains theoretical aspects of different types of menus and navigation of menus.
C418.4-PSO2	The CO indicates low correlation to higher studies and for innovative career paths as it explains windows systems, their presentation, characteristics and their components.
C418.5-PSO2	The CO indicates low correlation to higher studies and for innovative career paths as it explains only types of screen based controls.

## VIII. Bench Mark Setting

The syllabus of course User Interface Design (17CS832) is same as compared with the previous scheme syllabus of the University curriculum. The previous set target value 1.5 is achieved by 2.87. Therefore **set target value for academic year 2020-21 the CO attainment is 2.87.**

## VII. Target Attainment:

CO Attainment for the Course	
Target CO Level	2.87
Attained CO Level	2.79

## VIII. Course Coordinator Remarks:

S. No.	Observations	Comments
1	Impact of Delivery Methods	Delivery methods are satisfactory. Pedagogy used to deliver lectures is quite satisfactory. But overall attainment of all course outcomes is moderate as it is observed in CO attainment table. Because of covid-19 pandemic online teaching method was adopted, therefore due to limitations of online teaching the set target was not achieved.
2	Course Outcome Attainment	Overall Attainment of all course outcomes (CIE+SEE) is more than 50% on 1 -3 performance scale as observed CO attainment table. But attainment level of COs less than set target level. To improve attainment level course outcomes following activities are to be implemented. <ul style="list-style-type: none"> <li>Tutorial/Remedial classes are to be conducted to explain concepts in simpler way by one to one interaction to weaker/slow learners.</li> </ul>
3	Scope for Improvement	Below mentioned activities can be suggested. <ul style="list-style-type: none"> <li>NPTEL video lectures will be shared to students to clarify difficult concepts in the course.</li> </ul>
