Date and Time	16 th November 2021 at 02.00PM
Name of Activity	"A Workshop on Machine Learning & Automation Testing".
Type of Activity	Learning New Technologies
Target Audience	All CSE branch students
Number of Audience	120+
Activity In-charge	Prof. Nyamatulla M Patel

About the Activity:

A workshop on "Machine Learning and Automation Testing" was organized for all the students of CSE department by STAC, CSE Department and III Cell, HIT, Nidasoshi in collaboration with Softmusk Info. Pvt. Ltd., Belagavi. Objective of this event was to give awareness among students regarding Machine Learning and Automation Testing. The resource persons for this workshop were Mr.Sandeep Nimbalkar, Head Software Department, Softmusk Info. Pvt. Ltd., Belagavi, and Mr. Raj Kalyankar, Python Full Stack Developer, Softmusk Info. Pvt. Ltd., Belagavi. During the session resource person's explained the basics of Machine Learning and Automation, and later they explained in detail regarding different software testing tools and how students can develop themselves in the area of software testing and grab jobs.

During this workshop there was question and answering session, where many students asked lot of questions regarding Machine Learning and Automation. The resource person clarified all the queries from the students. The session was very useful to the students, wherein students understood lot of stuff related Software testing and Machine Learning. A total of 120+ CSE-department students attended the event and got benefitted.

Activity In charge-	Dr. S G Gollagi

About the Activity: Agile is an iterative approach to project management and software development that helps teams deliver value to their customers faster and with fewer headaches. Instead of betting everything on a "big bang" launch, an agile team delivers work in small, but consumable, increments. Requirements, plans, and results are evaluated continuously so teams have a natural mechanism for responding to change quickly. Software development teams have proven that implementing agile frameworks, like scrum and kanban, lets them deliver solutions to customers faster, with more predictability, and gives them the ability to react quickly based on new information. Implementing agile at the individual team level is relatively easy - the benefits are clear and the resources are plenty.
