Institutional efforts/initiatives in providing an inclusive environment i.e., tolerance and harmony towards cultural, regional, linguistic, communal socioeconomic and other diversities.

Institution believes in equality of all cultures and traditions as is evident from the fact that students belonging to different caste, religion, regions are studying without any discrimination. Though the institution has diverse socio-cultural and linguistic background, we do not have any intolerance towards cultural, regional, linguistic, communal socio economic and other diversities. To build a nation of youth who are noble in their attitude and morally responsible, the institute is proactively taking efforts in providing an inclusive environment. The initiatives are to promote better education and setting communal harmony. The various department of the HIT & NSS unit conduct orientation programs, awareness programs, workshops, webinars, commemorative day's celebrations and outreach programs to fulfill the above words.

1. **Justification for Mapping of POs & PSOs**

Mapped POs/ PSOs	Weightage	Justification
PO1	3	This activity substantially enlightens energy efficiency, power generation, energy services, facility management, environmental compliance, sustainable energy, and renewable energy.
PO6	2	This activity addresses briefly engineers have a diverse role in society regarding economical development. They can play an important role in infrastructure development, agricultural productivity, environmental sustainability, cooperation with academia, social and ethical roles, and mitigating the energy crisis.
PO7	3	This activity addresses briefly environmental problems directly related to energy production and consumption including air pollution, climate change, water pollution, thermal pollution, and solid waste disposal.
PO8	1	This activity addresses ethical background, which shapes our intimate relations with this universe and its things, is not adequately considered. The moral grounds of energy decisions work, and energy decision-making processes give rise to ethical problems.
PO9	1	This activity addresses a carefully selected team that joins well-informed individuals into a group setting to complete an important task regarding energy and its economics. The individuals are selected for their product knowledge, as well as their skills, reasoning, and leadership abilities.
PO10	1	This activity enlightens creates awareness and provides information and education on the development of energy and its economics.
PO11	1	This activity provides exposure to energy and is one of the most important inputs for economic development. From a physical viewpoint, the use of energy drives economic productivity and industrial growth and is central to the operation of any modern economy.
PO12	1	This activity enlightens cost-effective energy efficiency improvements that can have positive macroeconomic impacts, boosting economic activity and often leading to increased employment.
PSO1	3	This activity provides exposure to many of the key skills that mechanical engineers learn and develop a wide range of applications for renewable energy engineering.
PSO2	1	This activity addresses knowledge of thermodynamics, fluid mechanics, and heat transfer, for example, is essential for solving the wind power challenge outlined above, but the same expertise is also critical in designing hydropower infrastructure, optimizing cooling systems, and developing new energy storage

		technology such as thermochemical batteries and solar fuel for long-duration energy storage
PSO3	2	This activity enlightens about mechanical engineers have played a key role in enabling the world's transition to clean energy and more sustainable practices.

2. The activity mapped with PO1, PO6, PO7, PO8, PO9, PO10, PO11 & PO12 was found satisfactory with attainment levels of 2.802, 1.868, 2.802, 0.934, 0.934, 0.934, 0.934 and 0.934 against the Mapped values during the impact analysis.
3. The activity mapped with PSO1, PSO2 & PSO3 was found satisfactory with attainment levels of 2.802, 0.934& 1.868 against the Mapped value during the impact analysis.

Conclusion: The activity organized to fulfill the program outcomes engineering knowledge, engineer and society, environment and sustainability, ethics, individual & teamwork, communication, project management& finance, and lifelong learning and PSO1, PSO2 & PSO3 has mitigated the gap identified satisfactorily to some extent.

Future Suggestions: Such activity can be extended to multiple events for our students to create interest in renewable energy sources to avoid the current energy crisis in India.

1. Introduction

Raja Lakhamagouda dam, also known as Hidkal dam, is a dam constructed across the Ghataprabha River in the Krishna River basin. It is situated at Hidkal village in Hukkeri Taluk of Belagavi district in North Karnataka, India. It is located at a distance of 55 kms from Belagavi.

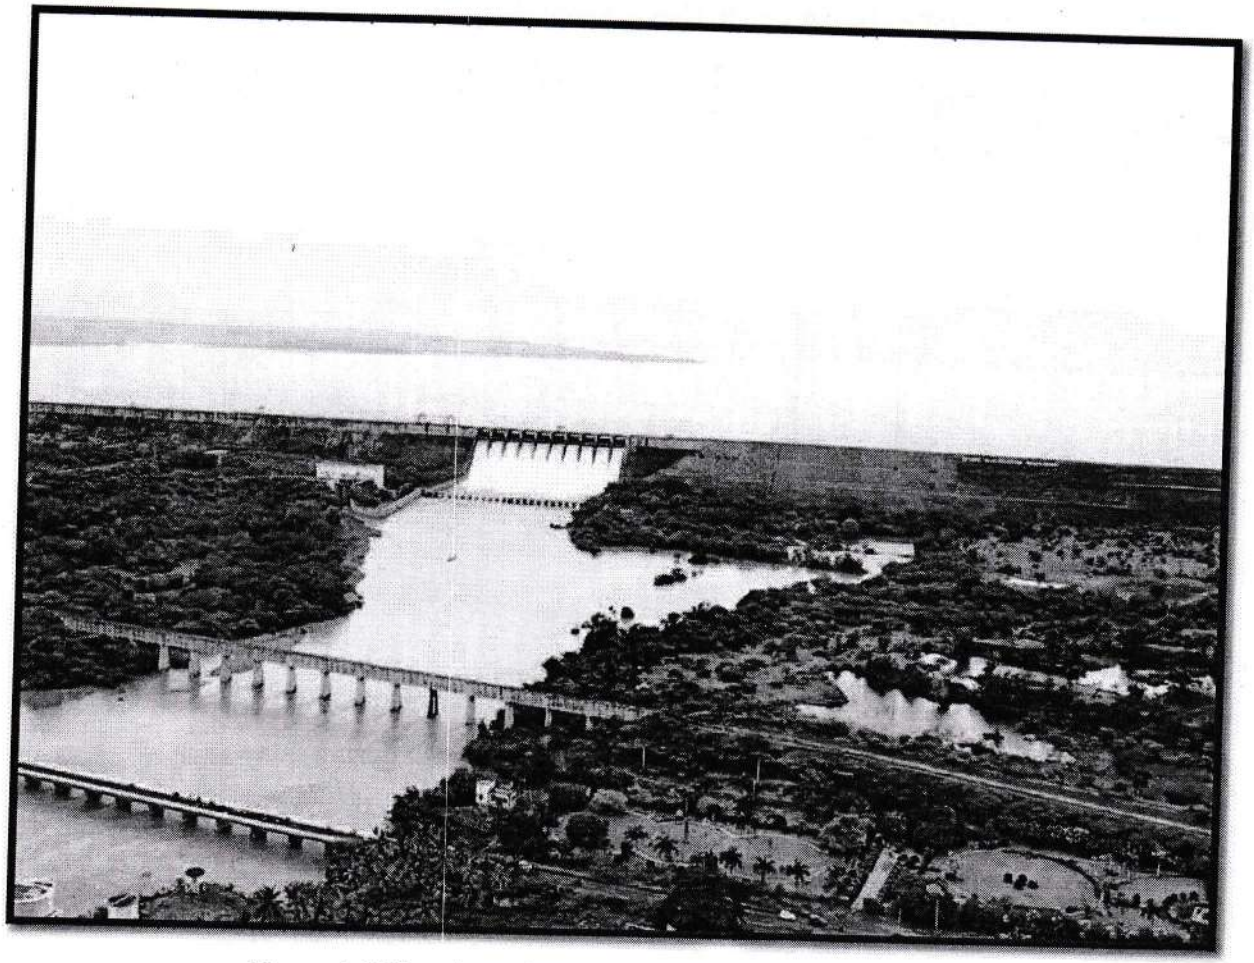

Figure 1.1The view of Hidkal Dam during rainy season

The dam with the height of 62. 48 metres and 10 Vertical Crest Gates, impounds a large reservoir with a gross surface area of 63. 38 Square kilometres, and storage capacity of 51. 16 Tmcft. It is an earthen and masonry dam which caters to the Irrigation needs for over 8,20,000 acres, and Hydel power generation. It is constructed as a part of the Ghataprabha Irrigation project which was completed in three phases and finished in 2009. The dam is named after Raja Lakhamagouda Sardesai, philanthropist and Zamindar of Vantamuri. The approximate expenditure of the Hidkal dam project was Rs. 9. 47 crores. This dam caters for the irrigation of approximately 13400 hectors of agriculture lands in the Hukkeri taluk of Belgaum. This dam is popularly known as Raja Lakhamgowda Dam. Numerous fossils were

excavated from nearby areas of the dam site which makes it a place of interest for the archeologists. It is also a popular tourists place for the tourists visiting Belgaum. Nearby attractions includes Belgaum Fort ,Kamala Basti, Kapileshwara Temple ,Rakaskop, Varapoha Falls, Ramakrishna Ashram, Kittur Fort and Palace. The dam is not only an enthralling picnic spot but also attracts many archaeologists who frequents the place to research about fossils which were revealed recently nearby the Hidkal Dam.

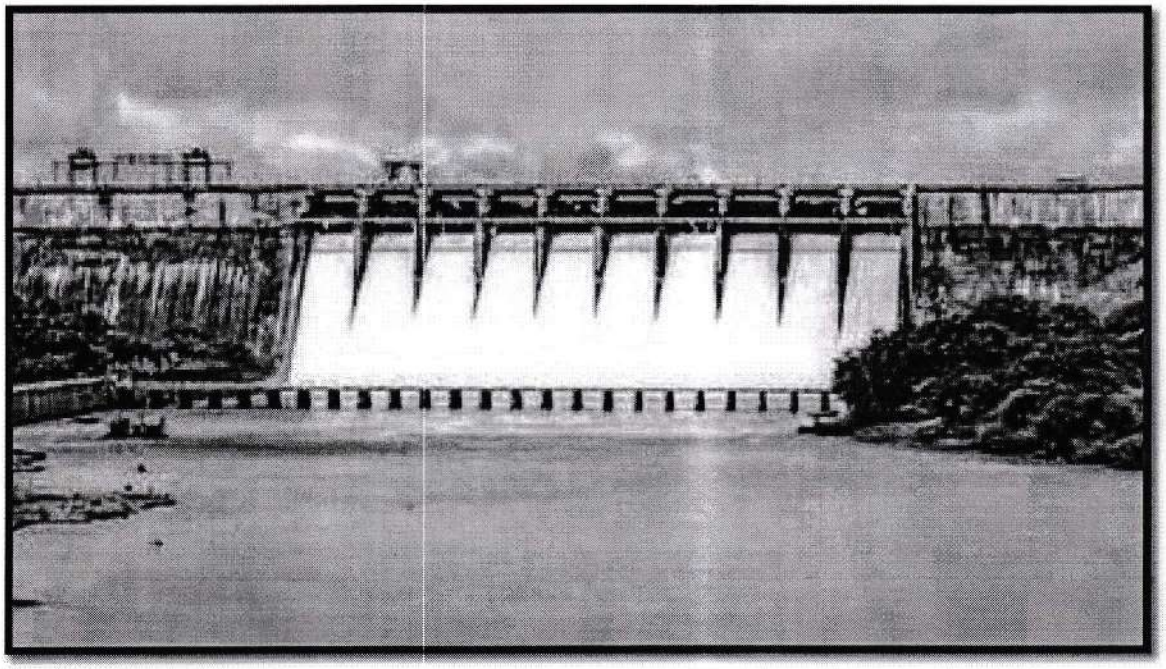

Figure 1.2 The Water flow from dam through radial gate during rainy season

This dam is home to a number of migratory birds like the Demoiselle cranes and Bar-headed geese that fly here every year, making it a roosting site. The area around the dam is now being used to cultivate sugarcane instead of the traditional paddy and wheat crops, disturbing the feeding habits of these birds. The dam is a place of profound natural beauty, archaeological interest and a nature spot for bird watching and is well worth a visit.

Best time to visit the Hidkal Dam is in the month of October-March as weather remains pleasant here. Visitors can visit the day during the day, usually with timings 8:00 AM - 7:00 PM. Entry fee is INR 5 per person.

2. Conclusions

Hydropower plants are a vital energy source to the world. Water is an efficient and reliable fuel. The use, creation, and expansion of power plants should continue being pursued. Understand the working principles of hydraulic turbine Understand energy conversion principle from hydraulic energy to mechanical output shaft energy.

Mapped POs/ PSOs	Weightage	Justification
PO1	3	This activity substantially addresses hydropower engineering a field of engineering that has to do with harnessing the energy of flowing water and turning that energy into electricity.
PO2	3	This activity substantially enlightens revolutionary concepts for hydroelectric energy storage and the analysis focusing on underwater hydro storage and hydropower's hybridization with fast energy storage systems.
PO3	3	This activity substantially enlightens advances in the electro-mechanical components and generator design with their potential role to adapt hydropower to the current operating conditions.
PO4	3	This activity is substantially about emerging and advanced technologies to mitigate flow instabilities as well as emerging magneto-rheological control techniques. Recent research findings on flow instabilities,

		especially concerning fluid-structure interaction and transient operating conditions.
PO5	3	This activity substantially addresses modern hydraulic turbines to meet new challenges associated with the variable demand on the energy market as well as limited energy storage capabilities, resulting in great flexibility required in operation over an extended range of regimes far from the turbines' best efficiency point.
PO6	3	This activity addresses briefly dams and reservoirs that can reduce river flows, raise the water temperature, degrade water quality and cause sediment to build up. This has negative impacts on fish, birds, and other wildlife.
PO7	3	This activity addresses briefly climate-friendly energy sources, generating power without producing air pollution or toxic by-products.
PO8	3	This activity addresses the significant potential for novel approaches in the planning, design, and operation of a hydropower station.
PO9	3	This activity addresses Project the potential size of the hydropower workforce under different growth scenarios and where skill set gaps exist relative to today's workforce.
PO10	3	This activity enlightens additional training programs are needed to meet anticipated hydropower workforce needs in 2030 and develop recommendations to fill the gaps
PO11	3	This activity provides the hydropower program is the abundant low-cost energy the projects contribute to electric power grids. Because hydroelectric power plants burn no fuel, operating costs are low and are immune to rising fossil fuel prices.
PO12	3	This activity enlightens innovation and aims at increasing hydropower's efficiency, flexibility of operation, and lifetime and reducing the costs of installation, operation, and maintenance.
PSO1	3	This activity provides exposure to many of the key skills that mechanical engineers learn and develop a wide range of applications for hydroelectric generation.
PSO2	3	This activity addresses knowledge of design procedure and analyzes hydro mechanical components design such as intake gate, Penstock size, and thickness, manhole, expansion joints, draft tube, turbine blade design, etc.
PSO3	3	This activity enlightens us about hydropower facilities can have large environmental impacts by changing the environment and affecting land use, homes, and natural habitats in the dam area.

2. The activity mapped with PO1, PO2, PO3, PO4, PO5, PO6, PO7, PO8, PO9, PO10, and PO11 & PO12 was found satisfactory with an attainment level of 2.988 each against the Mapped values during the impact analysis.

3. The activity mapped with PSO1, PSO2 & PSO3 was found satisfactory with an attainment level of 2.988 each against the Mapped value during the impact analysis.

Conclusion: The activity is organized to fulfill the program outcomes engineering knowledge, problem analysis, design/development solution, conduct investigations of complex problems, modern tool usage, engineering and society, environment and sustainability, ethics, individual & teamwork, communication, project management& finance and lifelong learning and PSO1, PSO2 & PSO3 has mitigated the gap identified satisfactorily to some extent.

Future Suggestions: Hydropower plants are a vital energy source for the world. Water is an efficient and reliable fuel. The use, creation, and expansion of power plants should continue to be pursued.
